STATUS REPORT

1. (U) (TS) Preparation for the actual operation continues. The six RH-53 helicopters have been flown from [redacted] to the KITTY HAWK. This movement was completed 281930Z Nov 79. Four AC-130s are prepared for further deployment from [redacted] through [redacted] to [redacted] on order. MC-130s at Hurlburt Field and [redacted] are prepared to deploy to [redacted] via intermediate base on order. [Delta] is continuing planning and rehearsing in accordance with available information. [redacted] Ranger's staff is planning for mission to secure [redacted] airfield.

2. (U) (TS) Additional training required includes a full rehearsal with [redacted] helicopters, MC-130s, AC-130s and [redacted] Rangers. The training, originally scheduled for Sunday, is tentatively scheduled for Sunday and Monday, 2 - 3 Dec 79.

3. (U) (TS) Logistics preparation is continuing on schedule.

4. (U) (TS) Impacts of variance from basic plan:

- failure to conduct full rehearsal will impair task force efficiency
- lack of designated recovery sites impairs medical support planning
- the lack of in-country support assets continues to impose constraints on the operation

(U) AUGMENTATION PERSONNEL FOR SPECIAL HELO OPERATIONS

1. In order to continue operations at present or future sites, two additional skills/personnel are required to present force.

- a. Hydraulic Man (AMH - 1 or 2) CDI Qualified
- b. Electrician (AE - 1 or 2) CDI Qualified

Two individuals known to be qualified are in the parent organization of the Marine personnel. If available, the operators desire to have:

- a. [REDACTED] HMH - 461, MAG-26
- b. [REDACTED] HMH - 461, MAG-26

2. In the event the helo unit relocates to another site with borrowed aircraft to continue training over a five day period, the following additional personnel will be required for the training period only.

- a. ONE AE Avionics Man
- b. ONE AMH Hydraulic Man
- c. ONE AMS Structure Mechanic CDI Qualified
- d. ONE PR Parachute Rigger CDI Qualified
- e. FOUR AD H-53 Mechanic

QUESTIONS

The series of unpredicted material failures raises several questions:

First was there a valid basis for the judgement that eight A/C were sufficient?

Second, what were the probabilities that the required number of mission capable helo's would remain operating at Desert One, the refueling site, and the helicopter hide-out?

Third, assuming that eight would provide a high probability for mission success, why were not more placed on board the ship and flown on the mission as additional insurance?

Fourth, what additional actions could have been taken to increase helicopter reliability?

Fifth, should an operations analyst or maintenance analyst have been able to predict the failures?

~~TOP SECRET~~
~~TOP SECRET~~

~~TOP SECRET~~

~~TOP SECRET~~

indicate that the seven aircraft that were operational during this period experienced a pre-flight abort rate of 6.3 per 100 flights and an in-flight abort rate of 3.8 per 100 hours. These numbers are not statistically different from the fleet data, therefore, for the purposes of this analysis, the fleet data, based on a significantly larger size, will be used.

Third, each abort experienced aboard the NIMITZ during the above forty-five day period was investigated to determine if the failure would cause abort during execution of this particular high priority mission. Of these 13 pre-flight and in-flight aborts, 6 were determined to be associated with equipment which would not compromise flight safety or mission success. Therefore, a derived "combat" preflight abort rate of 3.8% and an in-flight abort rate of 1.9% was computed. In the subsequent analyses these abort rates will be referred to as "combat" rates while the 18 month fleet rates will be referred to as "peacetime" rates.

To address the first three questions above, four statistical methods were used. The first approach involved computing the expected numbers of aircraft available at various points in the mission using the two abort rates cited above (Chart 1). Given 8 aircraft on board the NIMITZ and utilizing the combat abort rates, the planner could expect to have seven mission capable aircraft arrive at Desert One and six complete the mission at [Manzariyeh]. Using the higher peacetime abort rates, the planner could expect to have six mission capable aircraft at Desert One

~~TOP SECRET~~

2B10

~~TOP SECRET~~

~~TOP SECRET~~

and five at Manzariyeh. The addition of one more aircraft onboard the NIMITZ would not significantly change the expected numbers of aircraft available at either point because the numbers of aircrews available constrains the expected numbers of aircraft at take-off to eight. If, on the other hand, 9 crews and 9 aircraft were available each of the expected numbers of available would be increased by a factor of 1.

The second method (Chart 2) involved determining probabilities that 5 helicopters would be available at the completion of the mission at Manzariyeh given various numbers available for launch at the NIMITZ (assumes crews available). With eight aircraft available, the probability of 5 completing the mission is 90% using combat criteria and 75% using peacetime abort rates. If the number available is increased to 9, the probabilities increase to 96% and 87% respectively. Similarly, if only 6 had been available, the probabilities of 5 completing the mission would have been reduced to 58% and 36%.

The third approach (Charts 3 and 4) involves computation of the probabilities that 5 mission capable RH-53D's would arrive at the hide-site given that either 8 or 7 (mission abort criteria) actually take-off from the NIMITZ. Given 8 take-off, the planner would have a confidence range of 87% (peacetime) and 98% (combat) that 5 mission capable

~~TOP SECRET~~

2B11

~~TOP SECRET~~

~~TOP SECRET~~
~~TOP SECRET~~

RH-53D's would arrive at the hide-site if the mission went according to schedule. The 90 minute delay experienced on the mission would reduce this range to 78% (peacetime) to 96% (combat). If only 7 had launched on the mission, there would have been a confidence level of 85% to 92% that at least 5 mission capable helicopters would arrive at the hide-site.

Chart 4 can also be used to derive expectations subsequent to the abort of one aircraft. For example: If 8 aircraft are airborne and one aborts with six hours remaining on the mission, the planner still has an 86% to 96% expectation that at least 5 will complete that mission.

The fourth methodology (Chart 5) involved determining the probabilities of having at least 5 mission capable helicopters arrive at Manazariyeh given 6 or 5 depart Desert One. If 6 depart Desert One, There would be a 79% to 86% probability that at least 5 would complete the rescue mission. If only 5 were launched the probability range decreased to 37% to 56% that all 5 would complete the operation.

Based on analysis of the available RH-53D abort data, it can be concluded that there was a valid basis for the judgement that eight aircraft were sufficient to complete the mission. One additional aircraft onboard the NIMITZ would not have significantly affected the probabilities

~~TOP SECRET~~

2B12

~~TOP SECRET~~

~~TOP SECRET~~
~~TOP SECRET~~

unless manned by a qualified crew.

The analyses of the available data would indicate that with 8 aircraft launching from the NIMITZ, there was an 86% to 96% (combat) probability that at least 6 mission capable helicopters would depart Desert One and an 86-98% probability that at least 5 would arrive at the hide-out site.

In assessing the failures that occurred during the mission, there are no identifiable additional maintenance actions which could have been taken which would have precluded the failures. Those unique actions which were taken (i.e., removal of dust screens, inspection of hydraulic pumps, premature replacement of time-change items, etc) had no identifiable adverse impact on the mission. Using the most optimistic pre-flight abort data (combat) there would be a 73% probability of all 8 RH-53D's taking off. The fact that all 8 RH-53D's did take off and fly for two hours attests to the maintenance effort expended toward the success of the mission.

From a purely analytical perspective, it would be highly improbable that an operations or maintenance analyst could, with any degree of confidence, predict either the types or numbers of failures encountered on this mission. In addition, the analyst cannot predict the synergistic effects of unrelated events and the ultimate outcome on the mission. For example, with respect to Helo #5, TACAN failure did not

~~TOP SECRET~~

2B13

~~TOP SECRET~~

~~TOP SECRET~~
~~TOP SECRET~~

cause the abort. Flight instrument failure did not cause the abort. The reduced visibility did not cause the abort. Loss of visual contact with the flight did not cause the abort. Taken independently, each of these events had a low probability of occurrence. In fact, had any of these events not occurred, there is evidence that Helo #5 would have continued on the mission, arrived at Desert One with a mission capable aircraft thereby validating analytical predictions. Taken collectively, they caused a prudent decision to abort this flight and a subsequent mission abort.

~~TOP SECRET~~
~~TOP SECRET~~

2B14

~~TOP SECRET~~

To insure a high degree of mission success it was determined that five operational helicopters would be required to extract the former hostages and rescue forces from the two helicopters landing zones (HLZ) in Tehran. This number was based on the numbers of people to be lifted and the lift capabilities of the RH-53's given the probable temperatures and density altitudes in Tehran during this timeframe. There was an alternative plan to be employed should there have been less than five available RH-53D's available for the extraction. However, this entailed refueling one or more RH-53D's at Manzariyeh and returning to the HLZ to extract the remaining personnel. Because this action would take in excess of one hour, it would have placed those remaining at the HLZ at extreme risk.

Given the requirement to have five operational helicopters for the extraction, it became necessary to examine RH-53D abort data to determine aircraft reliability and mission requirements at various stages of the operations. Three sets of failure data are available.

First, pre-flight and in-flight abort data for the entire fleet of 30 RH-53's for the period of 1 July 1978 through 31 December 1979 was examined. It was determined that there had been an average of 6.3 pre take-off aborts per 100 flights and 3.3 in-flight aborts per 100 flight hours.

Second, maintenance records from the NIMITZ for the forty-five days immediately prior to mission execution

~~TOP SECRET~~

2B09

~~TOP SECRET~~

CHART 1. EXPECTED NUMBER OF RH-53D'S MISSION CAPABLE AS A
FUNCTION OF TIME, GIVEN 8 PROGRAMMED FOR LAUNCH
($E[x/\theta]$)

~~TOP SECRET~~

~~TOP SECRET~~

PURPOSE: The purpose of this figure is to show the expected number of RH-53D's to arrive Manzariyeh and intermediate points, given eight are available and programmed to depart the NIMITZ. For this figure, expected number is a mathematical expectation based on the probability that an event will occur. Given the probability data is valid, the decisionmaker can have a high degree of confidence that at least the expected number will occur.

BASIS FOR COMPUTATION: Three inflight abort rates are available to determine attrition during flight. First, the actual in-flight abort rate for the entire USN RH-53D fleet of 30 helicopters for an 18 month period (3.3 per 100 flight hours); Second, the actual abort rate experienced by the seven flyable RH-53D's on the NIMITZ (3.8 per 100 hours); and Third, a derived "combat" abort rate (1.9 per 100 hours) which eliminated those aborts from the NIMITZ which would probably not have caused an abort during this mission (similar data was not available for the entire fleet). The actual fleet experience was considered to be a more valid rate for computational purposes from a statistical standpoint. Thus, two curves are presented. The combat curve represents a "best" case (1.9 aborts per 100 hrs) and the peacetime curve (3.3 aborts per 100 hrs) depicts the "worst" case, statistically. The vertical distance between the curves provides the decision maker with a range of expectations of the number of aircraft available.

~~TOP SECRET~~
~~TOP SECRET~~

BASIC POINTS: The shaded area depicts the difference between the peacetime and combat abort criteria. For example, arriving Desert One (point B on the graph), the decisionmaker can expect to have more than seven RH-53D's operational when applying combat abort criteria, but less than seven with peacetime criteria. If the mission is flown on time to Manzarīyeh, you could expect better than six aircraft combat operational when the mission was complete.

The three rectangles on the graph depict the times at which numbers 6, 5 and 2 RH-53D's aborted the mission. The actual combat inflight abort rate for the mission RH-53D's was better than six aborts per 100 flight hours. The actual results far exceeded the historical and predicted abort rates and, thus, the expected number of combat operational RH-53D's.

Had it been known that the actual in-flight abort rate would be greater than six per 100 flights, 11 RH-53D's would have been required at the NIMITZ to insure you could expect better than five aircraft operational at Manzarīyeh. 11 aircraft at the NIMITZ would provide a more than 70% expectation that five helos are combat operational at Manzarīyeh.

~~TOP SECRET~~
~~TOP SECRET~~

32A13

SECRET

P_M [5/x]
(%)

~~TOP SECRET~~

~~TOP SECRET~~

PURPOSE: The purpose of this figure is to provide the COMJTF and staff with a measure of RH-53D mission completion. It was identified prior to mission launch that five RH-53D's were required at the American Embassy/Ministry of Foreign Affairs to extract the former hostages and rescue team. Depicted in the bar graph is the probability that five RH-53D's remain operational at Manzariyeh. Alternative numbers of RH-53D's available to launch from the NIMITZ are shown to depict the differing probabilities when considering more or less than eight.

BASIS FOR COMPUTATION: Three inflight abort rates are available to determine attrition during flight. First, the actual in-flight abort rate for the entire USN RH-53D fleet of 30 helicopters for an 18 month period (3.3 per 100 flight hours); Second, the actual abort rate experienced by the seven flyable RH-53D's on the NIMITZ (3.8 per 100 hours); and Third, a derived "combat" abort rate (1.9 per 100 hours) which eliminated those aborts from the NIMITZ which would probably not have caused an abort during this mission (similar data was not available for the entire fleet). The actual fleet experience was considered to be a more valid rate for computational purposes from a statistical standpoint. Thus, two curves are presented. The combat curve represents a "best" case (1.9 aborts per 100 hrs) and the peacetime curve (3.3 aborts per 100 hrs) depicts the "worst" case, statistically. The vertical distance between the curves provides the decision maker with a range of expectations of having five, or more, RH-53's mission capable at any point during the mission based on elapsed time.

~~TOP SECRET~~

~~TOP SECRET~~
~~TOP SECRET~~

BASIC POINT: The bargraph shows that if only six aircraft were available for launch from the NIMITZ, the probability of five combat operational RH-53D's reaching Manzariyeh is 58%. However, if the actual abort rate actually falls to the peacetime level, the probability of five is only 35%. For eight aircraft available on the NIMITZ, the probability of five combat operational at Manzariyeh is 90% and 75% peacetime operational.

The actual inflight abort rate for the RH-53D's was greater than six per 100 flight. Using that actual abort rate for the eight aircraft available on the NIMITZ, the probability of five combat operational at Manzariyeh is 19%.

B C D E F

TOP SECRET

TOP SECRET

~~TOP SECRET~~
~~TOP SECRET~~

PURPOSE: The purpose of this figure is to identify for COMJTF and staff the probability of at least 5 RH-53D's arriving a destination (Iranian coast, Desert One, hide out), given eight RH-53D's actually took off from the NIMITZ (i.e. the actual event on 24 April 1980).

BASIS FOR COMPUTATION: Three inflight abort rates are available to determine attrition during flight. First, the actual in-flight abort rate for the entire USN RH-53D fleet of 30 helicopters for an 18 month period (3.3 per 100 flight hours); Second, the actual abort rate experienced by the seven flyable RH-53s on the NIMITZ (3.8 per 100 hours); and Third, a derived "combat" abort rate (1.9 per 100 hours) which eliminated those aborts from the NIMITZ which would probably not have caused an abort during this mission (similar data was not available for the entire fleet). The actual fleet experience was considered to be a more valid rate for computational purposes from a statistical standpoint. Thus, two curves are presented. The combat curve represents a "best" case (1.9 aborts per 100 hrs) and the peacetime curve (3.3 aborts per 100 hrs) depicts the "worst" case, statistically. The vertical distance between the curves provides the decision maker with a range of expectations of having five, or more, RH-53's mission capable at any point during the mission based on elapsed time.

~~TOP SECRET~~

32A16

~~TOP SECRET~~

~~TOP SECRET~~
~~TOP SECRET~~

BASIC POINT: The table in the lower right hand corner of the figure gives the probability of take-off given eight RH-53D's are available. There was a 73% probability that eight combat operation aircraft would take-off - all eight in fact did. The probability curves then show that, once eight took off, there was a 99% probability at least five combat operational aircraft would arrive Desert One and a 98% probability that at least five would arrive the hide out. Even if the mission operational time to the hide out slipped from approximately eight to ten hours, the probability of at least five combat operational aircraft remained above 90%.

However, given the actual abort rate was greater than six, the probability that at least five operational aircraft would arrive Desert One and the hide out are 37% and 36% respectively.

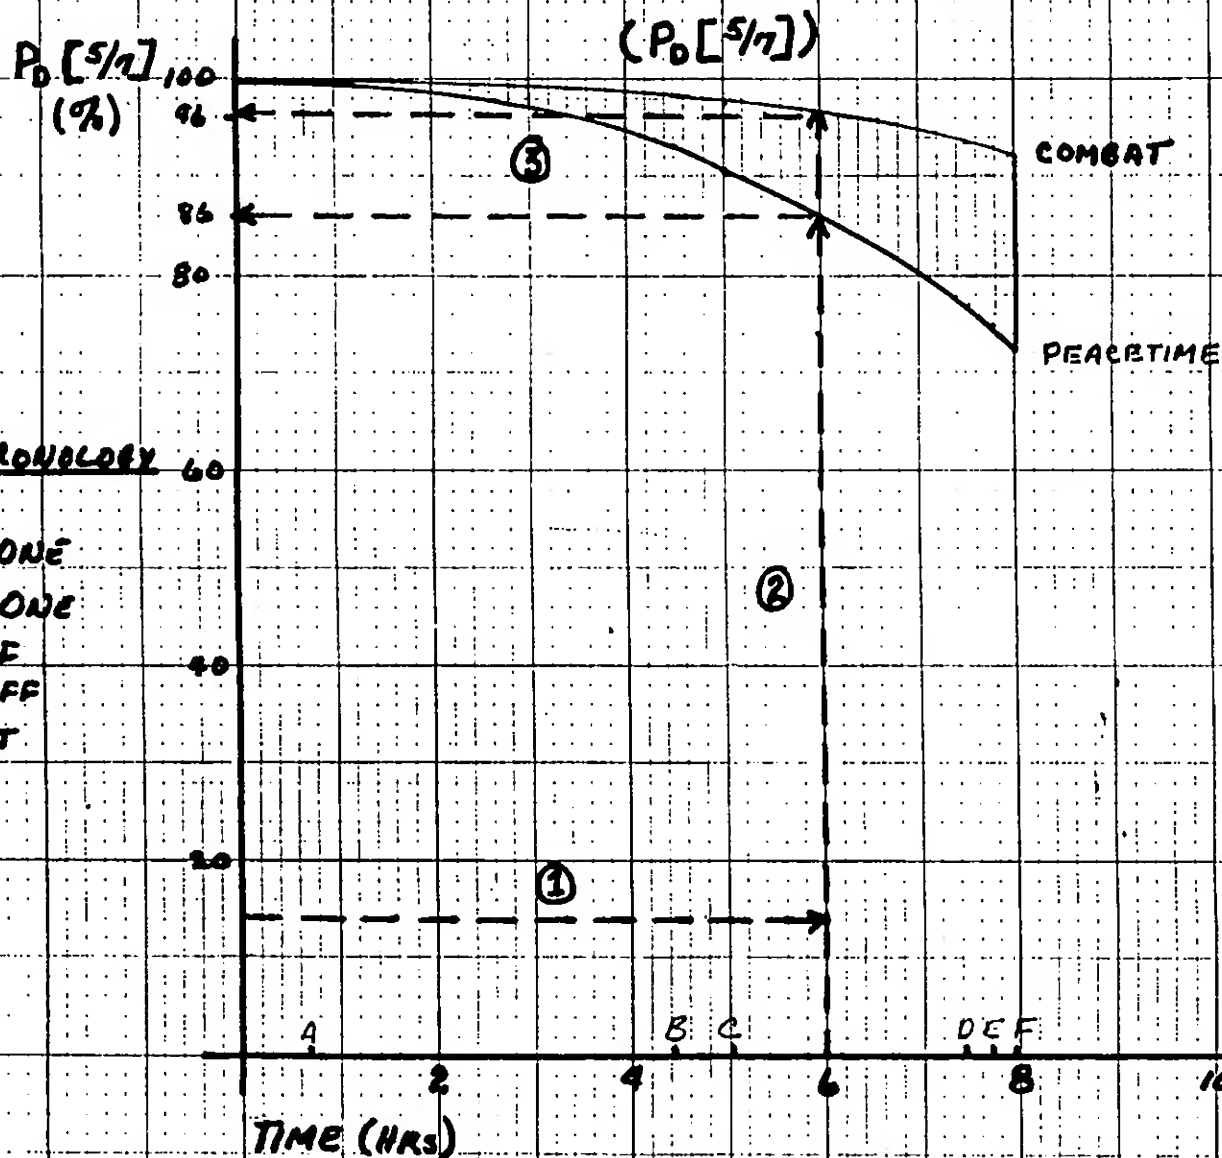

~~TOP SECRET~~

~~TOP SECRET~~

~~TOP SECRET~~

PURPOSE: The purpose of this figure is to show the COMJTF and staff the effect of "what if" only seven helos took off from the NIMITZ or "what if" one helo aborted enroute to the hide out. The figure displays the probability that at least five RH-53D arrive at a destination, given seven RH-53D take-off from the NIMITZ or one aborts after eight take-off.

BASIS FOR COMPUTATION: Three inflight abort rates are available to determine attrition during flight. First, the actual in-flight abort rate for the entire USN RH-53D fleet of 30 helicopters for an 18 month period (3.3 per 100 flight hours); Second, the actual abort rate experienced by the seven flyable RH-53s on the NIMITZ (3.8 per 100 hours); and Third, a derived "combat" abort rate (1.9 per 100 hours) which eliminated those aborts from the NIMITZ which would probably not have caused an abort during this mission (similar data was not available for the entire fleet). The actual fleet experience was considered to be a more valid rate for computational purposes from a statistical standpoint. Thus, two curves are presented. The combat curve represents a "best" case (1.9 aborts per 100 hrs) and the peacetime curve (3.3 aborts per 100 hrs) depicts the "worst" case, statistically. The vertical distance between the curves provides the decision maker with a range of expectations of having five, or more, RH-53's mission capable at any point during the mission based on elapsed time.

~~TOP SECRET~~

32A18

~~TOP SECRET~~

~~TOP SECRET~~

~~TOP SECRET~~

BASIC POINTS: The probability curves show that if seven instead of eight aircraft took off from the NIMITZ, the probability that at least five combat operational aircraft would arrive the hide out changes from 98% to 92%.

Suppose an RH-53D aborts after two hours (as did #6 helo) enroute to the hideout. This leaves seven helos with a planned time remaining of approximately six hours to the hide out. The figure shows that, given seven helos operational and six hours to go, the probability that at least five are operational at the hideout is 96%. The answer is obtained by starting at the origin and moving along the horizontal axis to 6 hours and then straight up to intersect the combat line which reads, with reference to the vertical axis, a probability of 96%.

FOR THE PAST FEW DAYS WITH THE CONCURRENCE OF [REDACTED]
[REDACTED], THE US HAS BEEN CONDUCTING SEA SURVEILLANCE
OF SOVIET FLEET OPERATIONS IN THE INDIAN OCEAN WITH
A-130 A/C BASED IN THE REGION. IT NOW APPEARS THAT
THE SOVIETS ARE MOVING THEIR SHIPS IN THE DIRECTION
OF THE UPPER PERSIAN GULF, AN OPTION WHICH I HAVE
JUST BEEN INFORMED IS IN PROGRESS WOULD USE TANKER
SUPPORTED C-130 A/C CROSSING [REDACTED] TO CONDUCT
CURRENT SURVEILLANCE OF THESE SOVIET SHIPS. THE MOST
EFFICIENT ROUTE TO THE WESTERN PERSIAN GULF AREA
ENTAILS FLIGHTS ALONG A [REDACTED] PATH
THROUGH YOUR COUNTRY. THIS UNANTICIPATED MILITARY PLAN
WILL FOR US COMMAND AUTHORITY HAS PICTURED USE OF
NORMAL CLEARANCE PROCEDURES. I EXPECT TO LEARN ADDITIONAL
DETAILS IN THE NEXT FEW HOURS AND WILL KEEP YOU ADVISED.
DEPORT LATE NOTIFICATION."

THIS SHOULD BUY ENOUGH TIME TO GET BASIC MISSION UNDER
WAY AND PRE-POSITIONED LETTER DELIVERED. PLEASE
ADVISE SOONEST. VAUGHT SENDS.

BT

Soviet
action and the
necessity to
clear our military
plan.
13
AIC
MAC

This unanticipated Soviet military
action and the necessity to
clear our military plan.

1. WE HAVE SERIOUS RESERVATIONS ABOUT CONTACTING [REDACTED] REGARDING OVER-FLIGHT. FIRST, THEY MAY WELL DELAY APPROVING PENDING CONSULTATIONSS WITHIN THEIR GOVERNMENT. SECOND, IT IS VERY LIKELY TO ALERT THE ENTIRE NETWORK.

2. IF AT ALL POSSIBLE, WE SHOULD ADJUST SO THAT WE AVOID RADAR COVERAGE OR HAVE EXPOSURE AT A VERY MINIMUM.

3. SUGGEST YOU EXAMINE LOWERING OF ALTITUDE FOR MC 130 REFUELING. I AM SURE YOU ARE CONSIDERING ADJUSTING TIMING SLIGHTLY TO DECONFLICT MC130 AND AC130 REFUELING.

4. ALSO, GEN DONNALLY AND [REDACTED] SHOULD BE AWARE OF RADAR SITUATION AND BE READY, WITHOUT TIPPING HAND IN ANYWAY, TO COOL SITUATION IF NECESSARY.

QUEST DELIVERY OF SENSITIVE LETTER TO
YOU WILL RECEIVE A SENSITIVE LETTER FROM
WILL BE DELIVERED TO YOU BY EITHER

ON 24 APRIL.

YOU MAY MAKE NECESSARY ARRANGEMENTS TO FACILITATE YOUR BEING
ABLE TO DELIVER THE LETTER TO [REDACTED] AFTER MIDNIGHT LOCAL
ON THE NIGHT OF 25/26 APRIL, BUT WITHOUT COMPROMISING THE FACT
THAT YOU HAVE TENTATIVE INSTRUCTIONS FOR DELIVERY. YOU WILL DELIVER
THE LETTER TO [REDACTED] ONLY UPON RECEIPT OF POSITIVE, EXECUTE
INSTRUCTIONS FROM THE CHAIRMAN, JCS VIA [REDACTED] CHANNELS TO THE

ASSIGNMENT IS TO DELIVER MESSAGE FROM CJCS
CHANNELS ONLY ON INSTRUCTIONS TO DELIVER MESSAGE FROM CJCS
TO [REDACTED] AFTER THIS AUTHORIZATION IS GIVEN BY CJCS YOU SHOULD
ATTEMPT TO CONTACT AMBASSADOR [REDACTED] TO ENLIST HIS SUPPORT TO GET
NECESSARY APPOINTMENT WITH [REDACTED] YOU MAY BRIEF AMBASSADOR ON
CONCEPT OF OPERATION AND ON YOUR MISSION JUST PRIOR TO YOUR DEPARTURE
TO SEE [REDACTED]
IF AMBASSADOR IS UNAVAILABLE YOU SHOULD PRESS ON IN OBTAINING APPOINT-
MENT WITH [REDACTED] ON THIS MATTER OF GREAT URGENCY USING THE GOOD
OFFICES OF [REDACTED] IF REQUIRED. IF [REDACTED] NOT AVAILABLE, YOU SHOULD
BRIEF [REDACTED] IF AMBASSADOR IS NOT AVAILABLE, YOU SHOULD BRIEF
AMBASSADOR AT EARLIEST TIME ON SUBSTANCE OF DISCUSSION WITH [REDACTED] OR
[REDACTED] AFTER [REDACTED] IN THE EVENT OF UNAVAILABILITY
OF [REDACTED] HAS READ THE BREVETED LETTER AND ARE AUTHORIZED TO ANSWER
SPECIFIC QUESTIONS ON THE OPERATION BASED ON THE [REDACTED] EXCEPT
THOSE DEALING WITH INVOLVEMENT BY OTHER AGENCIES. YOU ARE
NOT TO VOLUNTEER INFORMATION. YOU MAY INDICATE THAT WE WILL BE
SENSITIVE TO [REDACTED] CONCERNS OVER THE [REDACTED] OF QUESTIONS RELATED
TO [REDACTED] KNOWLEDGE OF THIS OPERATION. [REDACTED] QUESTIONS ON CON-
SULTATIONS FROM THE PUBLIC OR OTHER [REDACTED] WE WILL STATE
ONLY THAT WE CONSULTED AS APPROPRIATE CONSISTENT WITH SENSITIVITY
OF MISSION. YOU ARE AUTHORIZED TO [REDACTED] ON THE
GENERAL CONCEPT OF THE OPERATIONS INVOLVING [REDACTED] SPACE/ AND THE
USE OF [REDACTED] OR TRANSLING C-141. [REDACTED] HE US TO BE INFORMED THAT HE WILL
NOT HAVE AUTHORITY TO DISCUSS MISSION. [REDACTED] [REDACTED] HAS
BEEN BRIEFED. UNTIL GIVEN SPECIAL [REDACTED] THROUGH CJCS.
I REPEAT THAT YOU ARE NOT AUTHORIZED TO DELIVER THE MESSAGE TO
[REDACTED] UNTIL YOU HAVE RECEIVED DIRECT INSTRUCTIONS FROM
CHATHAM, JCS. YOU ARE AUTHORIZED TO TAKE STEPS NECESSARY TO
FACILITATE DELIVERY PROVIDED THEY DO NOT COMPROMISE THE INTENT
OF YOUR MISSION. YOU ARE NOT TO DISCUSS THIS MATTER WITH AMBASSADOR
OR ANYONE OTHER THAN [REDACTED] UNTIL SPECIFICALLY AUTHORIZED TO
DO SO.

HELO CREWS (1, 2, 4, 6, 7, 8) DEBRIEFED
1000Z APR 80 AT

STOD-D, DEBRIEFED SEPARATELY AT
SAME TIME.
REPORT OF HELO DEBRIEF:
NR 1: HELOS: NO PROBS.
NR 2: 2ND STAGE PUMP FAILURE 2 HOURS
AFTER T.O. MARGINALLY FLYABLE FM LZ.
NR 3: (BEFORE CRASH): 2D STAGE HYDRAULIC
FAILURE IN ROUTE. HYDRAULIC PROBS AT LZ.
NR 4: RETURNED TO NIMITZ. REASON UNKNOWN.
NR 5: LANDED IN DESERT WITH BAD HIM.
WAS NOT TRANSFER.
NR 6: AFCS PROBS ENROUTE.
NR 7: BAD AFCS SERVO. INTERMEDIATE
REAR BOX CHIP LIGHT LIT AT CIP (NORMALLY
REQUIRES PILOT TO LAND IMMEDIATELY, BUT
HE CONTINUED TO LZ.
NR 8: PILOTS EXPECTED HIGH OVERCAST ENROUTE.
AFTER CROSSING APPROX 29 DEG GRID LINE,
EXPERIENCED SEVERE DUST STORM. EXTENDED
TO AT LEAST 4,000 FEET -- MAYBE HIGHER.
IMPOSSIBLE TO KEEP IN FORMATION OR KEEP
SIGHT OF HELOS NEARBY. (THIS POSSIBLY
REASON NR 5 RETURNED TO NIMITZ). IFR
MAJORITY OF THE ROUTE.
WHEN NR 6 WAS FORCED TO LAND IN
DESERT, NR 8 LANDED WITH HIM AND TOOK OFF
CREW AND ALL CLASSIFIED MATERIAL. NR 8
CONTINUED TO LZ.
NR 1, 2, 3, 4, 7, 8 ARRIVED AT LZ.
NR 5 EC-130'S WERE FACING EAST, 2 NORTH OF
ROAD, 1 SOUTH. NR 5 HELO WAS NORTHERNMOST
HELO BEHIND NORTHERNMOST EC-130. NR 5
LIFTED OFF TO MOVE OUT FM BEHIND EC-130.
MAIN ROTOR STRUCK EC-130 NEAR COCKPIT, AND
BOTH A/C WERE IMMEDIATELY EXTINGUISHED.

CLASSIFIED BY 1235
CONTROL BY 72 AUG 92
EXEMPT FROM GDS
EXEMPT FROM COMINT
EXEMPT FROM AUTOMATIC
DECLASSIFICATION

THE HANGAR BAY OF NIMITS WAS ACCIDENTLY
STARTED ON 24TH. RESULTED IN SALT
SPRAY AND "PROTEIN" FOAM BEING SPRAYED
ON HELOS.

(1) EQUIPMENT/MATERIALS LEFT ON
A/C VARIES WITH A/C AND CREW
MEMORIES. HIGH CERTITUDE FOLLOWING ITEMS
VARIOUS QUANTITIES LEFT ON HELOS AT
LZ.

(1) FULL GEOI: PROBABLY J. WITH NUMEROUS EXTRACTS.

HELOS AND LZ BOOKS FOR TEHRAN AREA

(4) ROUTE BOOKS AND/OR MAP PRODUCTS (SOME CLASSIFIED)
OF ROUTES AND TEHRAN.

(5) CUV-8 CARD OF THE DAY (240400Z-250400Z APR 80.)

(6) TACAIR INFO SHEET INDICATING FOR EXAMPLE: WAREHOUSE AND
MAZARIYEH COORDINATES, "DELTA", "FRANCIS".

(7) LIST CONTAINING NAMES OF ALL HELO CREW MEMBERS.

(8) COURSE CARDS SHOWING ENTIRE ROUTE TO TEHRAN AND
MAZARIYEH.

(9) PROBABLY E & E KITS

(10) RADIO EQUIPMENT AND COMSEC MATERIALS.

REPORT OF DEBRIEF:
A. AS SOON AS THE INFILTRATION
AIRCRAFT HAD LANDED, THE
FIRST MAN OFF THE AIRCRAFT
STOPPED A VEHICLE WHICH WAS
HEADING EAST. THIS WAS A BUS
WITH 4 PASSENGERS, INCLUDING
THE DRIVER.

B. THE WESTERN BLOCKING ELEMENT
STOPPED THE NEXT ONCOMING VEHICLE,
AFTER IT INITIALLY REFUSED TO HALT. THE
DRIVER JUMPED FROM THE VEHICLE,
RAN TO A VEHICLE WHICH WAS
FOLLOWING HIM, AND LEFT TOWARDS
THE WEST. THE STOPPED VEHICLE
WAS A TANKER TRUCK WHICH SUBSEQUENTLY BURNED.

C. THE PERSONNEL ON THE BUS
WERE INITIALLY TAKEN
TO AN AIRCRAFT. LATER, THEY WERE MOVED
OUT TO THE EAST OF THE LZ AND
RELEASED.

D. NO REPEAT NO CIVILIAN PERSONNEL WERE KILLED
OR INJURED.

CONCEPT OF OPERATIONS

~~(S)~~ The operation will be accomplished during a nine day period (7 days for warning and positioning the force and 2 days for execution and recovery). Heavy lift helicopters (RH-53s), AC and MC-130 aircraft, refuelable C-130Es, C-141 airlifters and KC-135 tankers will be used. The helicopters will launch from the Nimitz. Other air operations will be conducted from [REDACTED] and [REDACTED].

(U) The operation in Iran takes two nights and one day. It is divided into three phases - Insertion, Hostage Release and Extraction.

A, E ~~(S)~~ Upon last light of the insertion day, SFOD-Delta (92 Delta personnel plus [REDACTED]) will be airlifted by 2 MC-130s from [REDACTED] to an isolated desert LZ in Iran.

(U) The first MC-130 will land on the desert LZ and Delta forces will immediately set up blocking positions on the road in order to control any vehicular traffic transiting the area.

(U) The second MC-130 lands desert LZ where number one has secured the area.

E ~~(S)~~ The first two aircraft will be followed by three C-130Es from [REDACTED]. Each of these aircraft will have two fuel bladders for a total of 18,000 gallons of fuel available for refueling purposes. Once the C-130Es have landed and are in position, the 2 MC-130s will depart for [REDACTED].

(U) Concurrently, 7 RH-53s will depart the USS Nimitz to marry up with the forces at the LZ. While at the LZ, the helos will refuel from the C-130Es and load the Delta personnel (the refuel and load evolution should take approximately 40 minutes).

(U) Once refueled and loaded, the helos will fly to a hideout area which is located approximately 100 KM from Tehran.

E ~~(S)~~ The C-130Es at the desert LZ will depart for [REDACTED].

-- Once the helos reach the hideout area, they will be camouflaged and defensive positions set up. This evolution will be completed prior to sunrise.

REVIEW ON OADR

DERIVED FROM Multiple Sources

DIA TC

~~TOP SECRET~~

~~SECRET~~

Classified By: JCS
Declassified On: OADR

~~SECRET~~

~~TOP SECRET~~

(S) The Delta force will move by [REDACTED]

(U) While at the warehouse, final preparations will be made for the hostage release phase.

(S) That night, Delta will move into Tehran [REDACTED] and enter the compound early the next morning.

(U) The hostage release can be completed in less than one hour - most will be out in 30 minutes or less.

(S) Two AC-130s will fly from [REDACTED] to the compound and provide on-call fire support if required.

(S) Concurrently, 2 MC-130s w/Rangers (61 personnel) from [REDACTED] will secure Manzariyeh. Two C-141s w/Rangers (14 personnel) from [REDACTED] will land immediately thereafter and prepare for the arrival of the helos from Tehran.

(S) A third AC-130 from [REDACTED] will be available to provide on call fire support at Manzariyeh.

(U) Once Delta has entered the Embassy Compound and initiated the hostage release, the helos will be called in for extraction and transportation of the hostages and Delta to Manzariyeh.

(U) A separate fully coordinated, concurrently executed plan will be used to free Mr. Laingen + 2 from the Foreign Ministry.

(S) At Manzariyeh the former hostages and any wounded JTF personnel will be loaded on the C-141 which will be staffed with an emergency medical team. This aircraft will fly to the nearest US military hospital, [REDACTED] and then on to Germany.

(S) Other personnel (Delta, helo crews and 14 Rangers) will board the second C-141 and fly to [REDACTED] for further transportation to CONUS.

(S) The AC and MC-130s (with 61 Rangers) will return to [REDACTED] or to other airfields, as the situation requires. All MC/AC-130 flights from [REDACTED] to Iran and return will require air refueling over [REDACTED]

~~TOP SECRET~~

~~SECRET~~

~~SECRET~~
OPSEC PLANNING CONSIDERATIONS

(U) This document addresses general and specific procedures that must be considered to avoid compromise of the operation and to maintain a high degree of OPSEC. Some of the measures have already been incorporated while others remain unfulfilled.

(U) I. MOVING FORCE TO OVERSEAS STAGING BASE

A. DELTA

(U) 1. HUMINT Threat to include inadvertent disclosure by the press, through family and friends.

a. Fort Bragg Responsibilities

(U) (1) Continue [REDACTED]

(U) (2) Continue personnel welfare activities such as residence checks, financial support, caring for families, etc.

(U) (3) Monitor Fort Bragg community (especially [REDACTED])

and other sources.

(U) (4) Monitor attachments and civilian hire (cooks, KPs, guards, etc.).

(U) (5) Divert press inquiries to HQDA PAO while otherwise refusing to talk to the media.

b. Delta Main Responsibilities

(U) (1) Conduct stringent OPSEC briefing to personnel.

(U) (2) Train and live in isolation; restrict contact of personnel with others; [REDACTED]

(U) (3) Move in isolation - no exposure when possible, [REDACTED]; apply need-to-know principle stringently.

(U) (4) Minimal exposure times on ground.

~~TOP SECRET~~

~~SECRET~~

A, B

(U)(6) Cover cargo with opaque material and transport only essential cargo.

(U)(7) Eliminate access to areas by foreign nationals when possible.

(U)2. PHOTINT/SIGINT Threats

(U)a. Program SATRAN information with movement times and utilize camouflage and concealment techniques when applicable.

(U)b. Emplace [REDACTED]

A, B

(U)c. Use maximum COMSEC procedures to include secure systems, rigid scheduled contacts except for emergencies, dummy traffic, etc.

(U)B. USAF

(U)1. Maintain similar measures as Delta.

(U)2. Special attention to concealment of aircraft and/or accounting for their presence overseas.

(U)C. RANGERS

(U)1. Maintain similar measures as Delta

A

(U)2. Move force under [REDACTED] and have [REDACTED]

(U)D. POTENTIAL DAMAGE FACTORS IN EVENT OF COMPROMISE

1. Hostages killed.
2. Increased security/vigilance by Iranians..
3. Hostages moved.
4. Combination of above.

II. MC-130 INSERT FROM STAGING BASE TO REFUEL/LAGER SITE

A. DELTA MAIN (HUMINT/PHOTINT/SIGINT THREATS)

1. Secure storage and facilities for personnel and equipment not taken forward.

~~TOP SECRET~~

~~SECRET~~

A

2. Continue COMSEC procedures with emphasis on [REDACTED]

B. RANGERS - same as for Delta.

C. USAF

1. Same as for Delta.

2. Minimal use of [REDACTED]
by USSR, Iranian, and other applicable ground/air stations.

A

3. [REDACTED]

4. [REDACTED]

5. Establish appropriate OPSEC measures for 1 or more aircraft encountering in-flight emergency.

D. CONSEQUENCES OF COMPROMISE

1. Same as I. D. above.

2. Possible decisive engagement of force by air defense guns/missiles and/or aircraft intercept.

III. RH-53 INSERT TO REFUEL/LAGER SITE

A. [REDACTED]

Threat is from USSR shadowing craft with visual, SIGINT, and PHOTINT capabilities; Iranian air platforms with visual, SIGINT, and PHOTINT capabilities; and Iranian ground SIGINT stations.

B. Develop plan to [REDACTED]. Threat is same as III. A. [REDACTED]

C. [REDACTED]

D. Establish appropriate OPSEC measures for 1 or more aircraft having in-flight emergency.

E. Minimal use [REDACTED] with COMSEC emphasis.

F. CONSEQUENCES OF COMPROMISE - same as II. D. above.

~~CONFIDENTIAL~~

~~SECRET~~

IV. TAKEOVER AND LAGER AT NA'IN

A. RANGERS (HUMINT/PHOTINT/SIGINT THREATS)

1. Recover/dispose of air items if applicable.

(2. Total elimination or capture of guarding force

[REDACTED]

(3. [REDACTED]

[REDACTED]

(4. [REDACTED]

[REDACTED]

5. Stress COMSEC procedures.

B. USAF

1. Develop landing techniques to avoid ground observation. Attention to light and noise conditions.

2. Ensure minimal ground time for aircraft with appropriate light/noise discipline - will engines be shut down; what is parking pattern, turn around, and takeoff procedures; what are refueling procedures?

3. Develop OPSEC procedures if 1 or more aircraft is unable to takeoff.

C. RH-53s

1. Same as for USAF.

2. Develop plan to protect/conceal aircraft from ground and air observation during the day.

D. DELTA - same as for rangers.

E. CONSEQUENCES OF COMPROMISE - Same as I. D. as well as possible decisive engagement of the force on the ground.

V. MC-130 RETURN FROM NA'IN TO STAGING BASE

Same as I and II above for USAF.

~~TOP SECRET~~

~~SECRET~~

~~VI (S)~~ RECRUITMENT/ PROCUREMENT OF [REDACTED]
(HUMINT THREAT)

~~SECRET~~

A. Standard agent recruitment procedures must be followed but time may not be sufficient to vett personnel and to ascertain full reliability [REDACTED]

~~C~~ ~~(S)~~ B. [REDACTED]
a manner as to avoid suspicion/investigation.

C. Compromise may result in same potential damage as in I. D. above as well as possible intercept and decisive engagement of force.

VII ~~(S)~~ [REDACTED] MOVE FROM TEHRAN TO LINK-UP POINT (HUMINT THREAT)

~~C~~ ~~(S)~~ A. [REDACTED] for concealment by trusted and reliable personnel to preclude leaks.

~~C~~ ~~(S)~~ B. Cut-outs should be used to assemble and mate [REDACTED]
[REDACTED] to avoid compromise.

~~C~~ ~~(S)~~ C. Plan must be developed to prepare [REDACTED] to link-up point to include appropriate cover, documentation, and procedures [REDACTED]
[REDACTED]

D. [REDACTED] near link-up point with an ostensible reason for being there or with concealment to avoid ground/air observation.

E. Consequences of compromise are the same as VI. C. above.

VIII. AIR MOVE FROM NA'IN TO LINK-UP POINT (HUMINT/SIGINT THREATS)

A. RH-53s

1. Establish OPSEC procedures in event 1 or more aircraft cannot take off or have in-flight emergencies.

2. Route planning to avoid ground and radar observation.

3. COMSEC measures.

4. Landing must be in isolated area to avoid ground observation with special attention to noise and light discipline.

~~TOP SECRET~~

~~SECRET~~

~~SECRET~~

B. DELTA/RANGERS

- A
1. Movement plan from aircraft [REDACTED] without being detected.
 2. Last minute concealment check after loading [REDACTED] and prior to move out.
 3. Capture or [REDACTED] any personnel observing aircraft.

IX. RH-53 GROUND TIME (HUMINT/SIGINT THREATS)

- A
- A. Conceal aircraft and personnel from air/ground observation.
 - B. Maintain security around aircraft, capture [REDACTED] ground observers or passers by.
 - C. Maintain radio silence.

X. [REDACTED] FROM LINK-UP TO TEHRAN (HUMINT THREAT)

- A. Develop plan to [REDACTED] or to pass through them to include control of [REDACTED]
- B. Noise/light discipline in vehicles.
- C. Maintain COMSEC measures.

XI. MC/AC-130 MOVE FROM STAGING BASE TO MANZARIYEH

Same considerations as for II above..

~~SECRET~~

~~TOP SECRET~~

2/0800Z (0300 Est)	Decision to launch MC-130	N/A	N/A
2/1000Z (0500 Est)	Launch MC-130: a. 5/MC-130 Airborne b. 4/MC-130 "	None Reduced fuel for Helo's	Go Go, will provide the 19 operational bladders to complete mission
	c. <4/MC-130 Airborne	Insufficient fuel for Helo's	<u>No Go</u> Delay 24 hrs
	d. >1:00 delay in T/O	Will not get fuel to helos in time for them to reach hideout by daylight	<u>No Go</u> Delay 24 hrs
2/1115Z (0615 Est)	KC-135 launch: 3 KC-135 Airborne <3 KC-135 Airborne	None Unable to accomplish MC-130 refueling	Go <u>No Go</u>
2/1150Z (0650 Est)	2 ARTS & 1 KC-135 launch, <2 ARTS & 1 KC-135 launch,	None Unable to accomplish MC-130 refueling	Go <u>No go</u>
2/1340Z (0840 Est)	MC-130 refueling: 5 successful 4 successful	Sufficient fuel for 6 Helos Sufficient fuel for 5 helos, can move camouflage to hideout	Go Go, Foldup 6th Helo and leave it + TACA
	<4 successful	Insufficient fuel for Helos	<u>No GO</u>
2/1430Z (0930 Est)	Helo launch a. 6/Helo airborne (5 w/ Delta/1 w/ extra support equipment, i.e., portable TACAN plus camouflage nets) b. >5/Helo airborne with no more than 1:00 delay c. <5/Helo airborne	Improves Delta's chances of having adequate helo support at the target Max delay, and still be able to reach hide out by daylight with sufficient aircraft Would unacceptably de-grade equip and personnel for "Delta"	Go If there is a delay instruct MC-130s to orbit <u>No/Go</u> delay 24 hrs Inform MC-130's & KC-135's

< = less than
 > = greater than
 ≤ = less than or equal to
 ≥ = greater than or equal to

TIME	EVENT/ SITUATIONS	CONSEQUENCES	DECISION/OPTIONS
	d.>1:00 delay	Cannot reach hideout by daylight	No Go, delay 24 hr.
2/1430Z 1515Z (1430 EST)	Helos goes down over water - Delta Helo down	Force unacceptably degraded	No Go, Recall Helos advise MC-130s to take 2nd refueling and RTB. Scramble SAR from Carrier, advise KC-130s/AFTS
	- Cargo Helo down	TACAN and camouflage nets gone	Option 1 - Delta Helos continue, launch SAR from Carrier Option 2 - Recall Helos advise MC-130 to refuel and RTB launch SAR
2/1640Z (1140 EST)	MC-130 refueling: 5 successful 4 successful 4 successful	Sufficient fuel for 6 helos Sufficient fuel for 5 helos, can move camouflage to hide out Insufficient fuel for helos	Go Go, Foldup 6th Helo and leave it + TACA No Go, recall Helos
2/1515Z 1810Z (1015 1310 EST)	Helos goes down prior to turn around point: - Delta Helo down	Force unacceptably degraded - may lose TACAN and camouflage nets	Other 5 helos land and spread the load Advise MC-130 to delay by no. of minutes required for recovery. - If injuries: Option 1: 6th helo lands, dumps cargo if necessary, p/u injured and return to carrier. Option 2: Abort, recall helos, advise MC-130's RTB, advise KC-135's
	Cargo Helo down	Crew requires recovery	Option 1: Launch SAR Delta Helos continue

TIME	EVENT/ SITUATIONS	CONSEQUENCES	DECISION/OPTIONS
			Option 2: Land each of the other 5 helos and load 1 crew member and 1 camouflage net on each. The FACAN should be able to go on one of the helos. Advise the MC-130's to delay
	More than one helo goes down	Force unacceptably degraded	Abort, recall helo, advise MC-130's to RTB, call for early KC-135 support
2/1810Z 1918Z 310-1418 EST)	6 helos operational for entire route	Arrive at refueling with all Delta and extra equipment	Go
	Delta or cargo helo goes down, no injuries	Part of attack force down, must be recovered	Option 1: Land all helos and spread load. Continue to refuel point Option 2: Land cargo helo and p/u De? plus crew. NOTE: Any one helo can recover Delta plus the crew. The cargo helo is 2000 lbs lighter
	Delta helo goes down with injuries	Force could be unacceptably degraded	Option 1: Abort, proceed to refuel point, take max fuel, return to carrier. Option 2: Proceed to refuel point, one helo will return to carrier with injuries. Remaining 4 helos on mission. (NOTE: No camouflage nets can be taken to hideout)

~~TOP SECRET~~

TIME	EVENT/ SITUATIONS	CONSEQUENCES	DECISION/OPTIONS
2/1948Z (1445 EST)	<p>Airdrop of fuel bladder:</p> <ul style="list-style-type: none"> - 5 MC-130's make drop - 4 MC-130's make successful drop. Bladders loaded 5/aircraft; one aircraft only has 4. <p><4 MC-130's make successful drop or <19 bladders are usable.</p>	<p>Enough fuel for all 6 helos if all bladders OK</p> <p>Worst case, if no bladders break, there will be 19 available. Best case, 20 bladders available, can break one.</p> <p>Insufficient fuel for 4 helos to make target</p>	<p>Go, can proceed with number of helos desired</p> <p>Can go with 4 helos if we get 19 bladders.</p> <p>Option 1: Try to extract fuel from a extra helos so as to get 4 operational</p> <p>Option 2: Spread personnel over 3 helos, strip down and return to ship</p> <p>Option 3: Delay 24 hours to get more fuel the next night</p>
2/2248Z (1745 EST)	<p>Helos launch from refueling:</p> <ul style="list-style-type: none"> 6 helos airborne 5 helos airborne 4 helos airborne 3 helos airborne 	<p>Will have extra helo support for extraction</p> <p>Adequate support for extraction</p> <p>Marginal support for extraction</p> <p>Minimum helos for extraction</p>	<p>Go, use 6th helo to carry max fuel</p> <p>Go, fold up 6th helo and leave it. Extract extra fuel for operational helos</p> <p>Go, spread Delta Helo crews and equipment over operational helos.</p> <p>Option 1: Proceed mission in degraded status</p> <p>Option 2: Spread personnel over 3 helos, strip down and return to carrier.</p> <p>Option 3: Delay in place 24 hrs. Try to fix helos or get more fuel, as req'd</p>

~~TOP SECRET~~

TIME	EVENT/ SITUATIONS	CONSEQUENCES	DECISION/OPTIONS
	2 helos airborne	Inadequate helo support for mission	Option 1: Delay 24 hours, try to fix helos or get more fuel, as required. Option 2: Load all personnel on 2 helos strip down and fly to RV near beach. Call for SAR. Option 3: Delay 24 hours, fly personnel to Manzarivoh in time to meet MC-130s and Rangers. Option 4: Delta and crews fly to vicinity of Darband. Takeover airfield the next night. MC-130's land and extract.
	1 helo airborne	Same as above	Same as option 4 above except cycle the one helo w/ Delta from refueling point to vicinity of Darband
	Zero helos airborne	Same as above	Walk to Darband, call for MC-130's when ready.
2/2248Z+ 1:00 (1811Z EST)	Helos must be off by <u>2348Z</u>	After this, cannot reach hideout by daylight	Delay 24 hours
2/2318 (1515 EST)	Helos pass point where they could turn around and return to carrier	Once beyond this point, the force is committed to <u>Manzarivoh</u> for extraction	JTF Commander can recall the force to the carrier, no contact means Go
2-3/2248Z 0124Z (8-2024 EST)	Helo goes down between refueling point and Delta's dropoff point: - 6 helos available cargo helo goes - 6 helos available, Delta helo goes	Aircrew on the ground with camouflage nets Delta force unacceptable degraded	2 helos land and p/u crew and nets 3 helos land, 13 Delta or crew board

TIME	EVENT/ SITUATIONS	CONSEQUENCES	DECISION/OPTIONS
			the cargo helo, 5 Delta board each of the other two helos
	5 helos available, Delta helo goes	Same as above	4 helos land spread load the personnel, attempt lift off with nets, if unable dump nets.
	4 helos available, Delta helo goes down	Same as above	Abort, strip down, spread personnel among 3 helos, proceed to hideout, extract on MC-130's the next night.
	3 helos available Delta helo goes down.	Same as above	From here on we must find a recovery airfield to secure and call for the MC-130's
3/0124Z (024 EST)	Any major problem at the dropoff point	Mission could be blown and/or force degraded	Option 1: Abort, move to hideout, meet MC-130s next night. Option 2: Continue, ground commander's decision.
3/2200Z 2210Z (1710 EST)	Helo goes down enroute to hideout	Will affect ability to perform extraction	If 3 or more helos available, continue; if < 3, inform Delta and abort to <u>Satubaf</u> <u>Manzariyeh</u> <u>K.F.</u>
3/0124Z 2135Z 4 - 3/1635)	Delta is discovered enroute while helos are at hideout	With the force split Delta must be able to call the helos to a predetermined RV	Move helos at night to RV to p/u Delta then to <u>Manzariyeh</u> for extraction.

When helo's lift off, direct them to appropriate P/U zone.</p> <p>- Establish Manzariych as rally point, Helo go to Manzariych if no contact with Delta</p>

~~TOP SECRET~~

PENETRATION OF IRANIAN AIRSPACE

Q: What was the first take off time for the helicopters departing the carrier?

A: 1507Z (1007 EST) (1937 Tehran local)

Q: What was the first take off time for the C-130 aircraft?

A: The first aircraft departed at 1400Z (0900 EST) (1830 Tehran). NOTE: This information with simple arithmetic and knowledge of C-130 flight speed could indicate the launch location of the C-130s.

Q: At what time did the helicopters enter Iranian airspace?

A: Based on an estimated position of 50 NM from the land mass of the carrier and recognizing a 12 mile boundry limit from territorial land, the aircraft should have entered Iranian space at 1518Z (1018 EST) (1948 Tehran).

Q: When did the C-130s first enter Iranian airspace?

A: Again using the 12 mile limit as criteria, the first C-130 would have been in Iranian airspace at 1531Z (1031 EST) (2001 Tehran).

Q: When did the aircraft depart the landing site?

A: The exact time of departure and route flown by the aircraft are unknown. Estimated departure time was 2245Z.

Q: When did the aircraft depart Iranian airspace on its return?

A: The exact time is unknown. Based on the expected coast out time, the aircraft would have passed the 12 mile limit at 0113Z (2113 EST) 0543 Tehran).

~~TOP SECRET~~

~~CONFIDENTIAL~~

Q: What was the exact number of US personnel on or over Iranian soil?

A: The exact number is unknown due to changes in the force made up after the JTF had moved to its forward location. However, based upon best information available here, the force was between [REDACTED]

NOTE: This can be broken down into:

Aircrew: [REDACTED]

Others: [REDACTED]

Both figures are approximate

Q: What was the nature of the operation?

A: The mission was humanitarian in nature and designed solely to rescue Americans held hostage in the Embassy in Iran with minimum injury to Iranians. Evidence of this was the detaining and subsequent release of Iranian citizens at the desert site.

Q: What was the maximum penetration of Iran?

A: Distance from the coast to the actual landing site is approximately 500 Nautical Miles.

Q: How long was the force actually on the ground?

A: As the actual departure time is unknown, an exact answer cannot be given. However, from the landing of the first aircraft at 1813Z until the estimated departure time of 2245Z is four hours and 32 minutes.

~~CONFIDENTIAL~~

~~SECRET~~

(ONF)

SAR SUPPORT FOR IRANIAN OPERATION

- ASSUMPTIONS

- Permissive environment at forward operating location (FOL).
- Less than permissive environment in-country Iran.
- FOL will be bare base (worst case).
- Night operations for optimum cover.
- No in-country aerial refueling (AR).
- Possibly no helo AR at all.
- SAR objective(s) may have to E&E up to 48 hours.

- RECOMMENDED FORCES

~~(S)~~ Aircraft.

- 2 HC-130 tankers from [REDACTED]
- 3 HH-53H PAVE LOW III helos from Kirtland AFB NM.
- Personnel (116 Total).
 - Aircrew (42 total).
 - 3 HC-130 Crews (24 people - 9 off, 15 enl).
 - 3 HH-53 crews (18 people - 6 off, 12 enl).
 - Maintenance (61 total).
 - 1 off, 60 enl.
 - Rescue coordination center (RCC) (4 total).
 - 2 off, 2 enl.
 - Support folks (9 total).

Classified By: JCS
Declassified ON: OADR

~~CONFIDENTIAL~~
~~SECRET~~

Downgraded by:
DDO NMCC
12 Aug 92

~~SECRET~~

- The helo will fly to a position with a second helo as backup (ramp space).
- HC-130 will orbit in safe area during actual SAR to act as airborne mission commander and comm relay.
- RCC will control mission.
- Depending on objective location, HC-130 will refuel helo feet wet just before coast in country and be available to refuel helo on coast out.
- Unrefueled range of helo is approx 1000 NM with 20,000 lbs fuel.
- Requires 650 gal external tanks and 4-2000 lb internal tanks/acft.
- (---- Helo could fly to Nain and RTE with no AR.
- Helo could fly to Manzariyeh and RTB with 1 AR.

- ALTERNATIVES

- Airlift could be cut to 2 C-5s.
- Only 2 helos could go (not recommended).
- Need 3rd helo as spare aircraft/cannonball (currently no WRSK for PAVE LOW III, and there is a shortage of black boxes).
- If limited to 2 C-5s, we will cannonball critical parts at Kirtland.
- Deployment timing.
- Two options.
- Option 1 - Deploy ASAP (E-X).
- Pro's.

~~SECRET~~

~~CONFIDENTIAL~~

~~SECRET~~

- Flow C-5 arrival into normal traffic.
- Extra ^{time} to assemble/PCF helos.
- Extra time to establish support ops/comm.
- Give time for helos to become accepted part of airfield ops.
- SAR could be conducted sooner.

----- CON's.

----- OPSEC could be compromised.

~~(A)~~ ----- [REDACTED] required.

----- Option 2 - Deploy so as to arrive FOL on D-day.

----- Pro's.

----- Less chance to blow OPSEC.

~~(A)~~ ----- Probably would not require [REDACTED]

----- Con's.

----- Timing critical on helo build-up.

----- Less responsive to potential SAR objective(s).

----- Longer E&E for SAR objective(s).

----- "Murphy's Law" (e.g., "The hurrier I go ...")

~~(A)~~ - ACTIONS REQUIRED

-- Select maintenance teams and practice tactical teardown and buildup of HH-53H.

--- Has been scheduled during 11-15 Feb [REDACTED]

[REDACTED]

[REDACTED] 26 Mar.

-- Practice tactical loading of PAVE LOW III on C-5.

--- Has been scheduled 13-14 Feb under same [REDACTED] as above.

~~CONFIDENTIAL~~

~~SECRET~~

~~CONFIDENTIAL~~

~~SECRET~~

- We will get 10 internal tanks (4 more)

A

--- Being worked [redacted] of increasing long range deployability of HH-53. Tanks are identified - will come from McClellan to Kirtland O/A 10 Feb.

-- Get Marine internal tanks (8 required with associated hardware).

A

--- Being worked [redacted] as above.

---- These USMC tanks are in short supply. As of now the only eight operational tanks we know of are in use at the desert site.

-- Test flight PAVE LOW III with 650s/Internals so Air Force crews can become familiar with internal tank and increased gross weight operations.

--- Waivers are required.

---- Operation of helo at 50,000 lbs G.W. vs 42,000 lbs.

- BOTTOM LINE

-- Need approval of this concept ASAP so we can get the SAR forces (aircrew, intel, etc.) up to speed.

~~TOP SECRET EYES ONLY~~
THE JOINT CHIEFS OF STAFF
WASHINGTON, D.C. 20301

THE JOINT STAFF

28 January 1980

MEMORANDUM FOR THE CHAIRMAN, JOINT CHIEFS OF STAFF

Subject: Conditions for Hostage Rescue Attempt

1. ^u~~(TS)~~ The attached paper by the JTF explores the factors affecting a decision to rescue the hostages. The summary on page 8 gives a good thumbnail sketch of the analysis.
2. ^(U)~~(TS)~~ It appears to me that three external conditions can apply:
 - a. Hostages secure. Negotiations continuing as at present.
 - b. Hostages gravely threatened by current captors, other competing politically oriented terrorist organizations, or mob action during chaos.
 - c. One or more hostages injured or killed.
3. ^(U)~~(TS)~~ The odds on success (60-70% in execution tempered by 15-30% possibility of disruption) do not appear to be high enough to warrant an attempt under current conditions. If we wait until hostages have been injured or killed, the pressure to act will be so high, and the situation in Iran so uncertain, that the odds for success would certainly be drastically reduced. The hard part will be to recognize a time of increased danger and to act accordingly. The team is continuing to refine plans to deploy, in particular to get to the shortest response time consistent with operational security. Because the movement of the helo crews to the carrier takes the longest time and also because their stateside activity is the most likely OPSEC give away, we may want to move the crews forward in increments as the next step to reduce response time.

Very respectfully
Philip D. Shutler
PHILIP D. SHUTLER
Lieutenant General, USMC
Director for Operations

~~TOP SECRET EYES ONLY~~

~~TOP SECRET~~

404

25 JAN 80

1. It is possible to assess factors which may be used to determine if and under what conditions the US should attempt rescue of the American hostages in Tehran.
2. Following is a list of factors which may be assessed and weighed. (The list does not include geo-political or strategic factors)
 - a. The US team of men and machines and its ability to complete the mission.
 - b. The ability of Iran to frustrate or prevent success.
 - c. The threat to safety of the hostages.
 - d. Operations Security (OPSEC). (How long can the training and planning continue without discovery and become known by the Iranians.)
 - e. Ability of the Soviets to detect deployment and employment.
3. Assumptions:
 - a. That a rescue will not be attempted until diplomatic and economic efforts fail to bring release.
 - b. That the US would attempt a rescue should the lives of the hostages be threatened greatly or if there were other compelling reasons.
4. Criteria for rescue success. There could be several criteria for predicted success ranging from all hostages rescued with no loss of American lives to almost the reverse. This paper sets the criteria as follows: More hostages rescued than killed or continued to be held in addition to those of the rescue force killed or captured. (NOTE: This criteria does not include those personnel lost due to an operational

~~TOP SECRET~~

accident of a fixed wing or helicopter aircraft.)

5. Factor assessment:

a. The US Team. A team of personnel has been formed and trained to perform well. The machines have been modified and enhanced and the men have developed techniques to perform at a far greater capability than has existed previously. An adequate Command Control Communications system has been developed to support the mission. With the exception of Search and Rescue, events to be performed during the mission have been accomplished satisfactorily during functional training and two rehearsals. There are unknowns at this time to include the conditions at the currently selected helicopter drop off point for Delta and arrangements for a holding area for ~~Delta~~ in Tehran and the precise hostage location. We have good confidence that the team has the ability to perform each segment of the mission. However, due the fact that each segment is interdependent on others, our assessment for total mission profile will be limited to the range of 60-70% even after we receive satisfactory information on the drop off point and Tehran holding area.

b. Ability of Iran to frustrate or prevent success. There are indications that instability within Iran is increasing. [The

~~_____~~
~~_____~~ The Gendemarie is beset with internal problems and the National Police have been largely delegated to the role of traffic control and security of official buildings. There are

~~TOP SECRET~~

also signs that the Pasdaran are experiencing coordination problems. The government is becoming more fragmented and ineffective. Two national issues have drawn attention away from the compound; the national elections and the Soviet threat. The absence of US newsmen has reduced the demonstrations and the fervor within Tehran. Our assessment of these indicators is that the ability of Iran to frustrate a rescue mission up to the Embassy Compound wall is less than it was prior to 1 Jan. Time, lack of success and poor weather have a debilitating effect on the captors to the extent that morale and the effectiveness of security will wane. We assess the capability of Iran to frustrate the mission at 20-30%.

c. Threat to Safety of the Hostages:

During the first 45 days of captivity, the threat for safety of the hostages was tenuous and high. The situation was unstructured and chaotic; circumstances were such that there were compelling reasons to seriously consider an immediate rescue. In the last few weeks, other events to include the Soviet Invasion in Afghanistan, the Iranian Presidential Election and departure of the American Press seemingly has reduced the focus, value, and immediate importance of the hostages to Khomeini and the captors. Because of these events, one might conclude that conditions in Iran may be more structured, and that the hostages will continue to be protected by Khomeini with the captor's cooperation. At the least, it would seem, the hostages will likely remain safe unless a

~~TOP SECRET~~

new event planned or unplanned by various elements in or out of Iran bring re-focused attention and new demands for trials.

While we may take some comfort in apparent conditions today, they may not be valid or changes could occur rapidly. Neither Khomeini nor the captors have changed their hard position; no release until the Shah and his wealth are returned to Iran. Despite all unilateral and bilateral initiatives by the US and UN the requisites for the release have not changed. Another factor is the orientation of the captors, their leadership and source of funding and what precisely is their potential political strength and real goals? Are they, as some believe, "a state within a state"? What is their source of authority and political strength and how steadfastly will they hold their position and will they accede to Khomeini direction should he order their release? Another factor to consider is the probability that the current conditions of anarchy, chaos and lack of government authority will be reversed and improved in the near future. It is questionable that election of a President alone will lead to improvement of conditions since a newly elected President will have a thin political base, and will not have effective ministers for some time. He will, therefore, draw upon Khomeini's legitimacy and authority for

~~TOP SECRET~~

~~TOP SECRET~~
an indefinite period.

The conditions described above, if reasonably accurate, give little comfort and confidence that the safety of the hostages, judged to be acceptable today, will remain acceptable in the future. We are unable to predict future conditions. However, we believe it is feasible to identify indicators and events which would enable the US to ascertain when the safety of the hostages becomes seriously jeopardized. Following is a list of indicators and events offered as a range of possibilities for tracking and assessment.

6. Generally, two broad situations could develop. The first is an abrupt increase in the threat and the second a gradual but detectable change.

(1) Abrupt changes:

(a) A diplomatic incident which could cause an immediate trial.

(b) A sudden but undetected decision by the captors to gain or regain cognizance from Khomeini, which could be manifested by trials or outright direct threats.

(c) A decision by unknown elements in or outside Iran which may have influence over the captors to escalate matters quickly.

(d) A physical accident on the compound such as accidental shooting of one or more hostages.

~~TOP SECRET~~

(e) Further disruption of life in Tehran such as experienced in Tehran resulting in complete disappearance of law and order.

(f) An attack on Iran by Russia or Iraq.

(g) US required to suddenly take military action such as protection of shipping lanes in Persian Gulf.

(2) Gradual and detectible increase in threat:

(a) A diplomatic incident which would cause Khomeini or captors to schedule a trial.

(b) A hardening of the captors position and attempt to gain or regain cognizance from Khomeini which could lead to trials

(c) A decision by unknown elements in or outside Iran which may have or could gain influence over the captors to cause a trial.

(d) Gradual beginning of riots in Tehran and loss of law and order.

(e) A deepening of anarchy, greater chaos, and a loss of control by Khomeini and the new President, resulting in competition among groups each struggling for control of the hostages.

C (f) US loss of communications as result of news media departure, [REDACTED]

and other sources. The US would be unable to monitor the situation in Iran which in turn would cause grave

~~TOP SECRET~~

~~TOP SECRET~~
national concern for hostage security.

(g) Indication of impending Soviet or Iraq invasion of Iran.

(h) A possible growing need for US military action:
for example, protect the oil supply line.

d. Operations Security: The useful life of the US team for hostage rescue could be ended abruptly with either public disclosure of its existence or as a result of strong suspicion by the Soviets and Iranians. It is indeed remarkable that the effort has not yet been exposed. We cannot predict the circumstance that would expose the effort; however, the chances of exposure grow each day as we train. Although OPSEC is stressed daily, an unfortunate incident or remark by team members could occur. Further, some of the forces such as Delta are cancelling scheduled events, some of which are with foreign governments. Our assessment is that OPSEC can be maintained for a range of 2-6 weeks.

e. Ability of the Soviets to detect deployment and employment. We believe that should the Soviets become knowledgeable of movements, they would either make it known publicly or privately to Iran. Through strategic and tactical deception (subject of a previous paper) properly accomplished, we can avoid detection. Our assessment is high for probability of non-detection.

~~TOP SECRET~~

6. Summary: The US team of men and machines is capable of performing the mission. Two important facilities remain undetermined: the drop-off point for Delta and a holding area for Delta in Tehran. Assuming satisfactory determination of these facilities, we assess the probability of the team's mechanical capability to complete the mission at 60-70%. We assess the capability of Iran to frustrate the mission at 15-30%. Although the future threat to the hostages is unpredictable we believe that certain indicators and events would enable the US to ascertain when the safety of the hostages becomes seriously jeopardized. The useful life of the US team cannot be protracted indefinitely. The existence of the force could be compromised and operational security lost at anytime. We are unable to predict how long OPSEC can be maintained, but judge it to be in the range of an additional two to six weeks. Effective strategic and tactical deception should enable the mission to be conducted without prior knowledge of Iran or Russia.

Working Paper for J-3

SUBJECT: Current Political Situation in Iran (U)

1. ^(U)~~(C/NOFORN)~~ The sudden hospitalization of Ayatollah Khomeini has altered the political situation in Iran because of concern for his health and the fact that he may suddenly die, leaving a vast power vacuum. Even before his illness there were signs that the political struggle among the religious hierarchy was intensifying, and we suspect there is much behind the scenes maneuvering at this time, even though Khomeini is alive and may completely recover from the current ailment. There is no clear-cut successor to Khomeini, and religious rivals will be working to attain the prominent position. This will detract from efforts to organize the first post revolution government, and will defer even further attempts to restore order and get the economy moving again.
2. ^(U)~~(C/NOFORN)~~ The election of Bani Sadr as Iran's first president raised what we believe to be false hopes that the hostage situation could be quickly resolved. Despite his supposedly "conciliatory" position on this issue, he does not have the political clout to resolve it by himself. The lukewarm endorsement of his victory by Khomeini has not significantly strengthened his position, and he has already squabbled with the revolutionary council on the issue of who would swear him into office, Khomeini or the yet unelected national assembly. Even though he has been sworn in by Khomeini, he must now wait until the national assembly is elected and he has chosen his cabinet and prime minister before he has a functioning government. We expect no action on the hostage issue before these events are completed, which is another two months or so away. Until then we can expect to see continuing confusion and turbulence in Iranian politics, diverting attention away from the hostage issue, except for occasional moments which cannot be predicted.
3. ^(U)~~(S/NOFORN)~~ There seems little doubt to us that the militants at the US Embassy are an element to be considered in internal politics in Iran. However, they seem frustrated at the moment, and a little concerned that events may be passing them by. The "lamentation" issued by them over the past weekend reflects their concern that the hostage issue is being pushed into the background, and that the government and others may be working to resolve it. Even at the height of the crisis, in November and December, despite the turmoil around the embassy, life in Tehran seemed to go on as before, with little concern by the average Tehrani over events downtown. Without daily news coverage, demonstrations have tapered off, and a certain degree of apathy towards the hostage crisis seems to be setting in among the populace. Even the militants are likely bored at this point. Their public statements have tapered off in number and do not appear to be as substantive as they once were. It would be dangerous to assume, however, that the militants have relaxed their guard, and as far as we can observe, defenses at the embassy are still good. The

~~SECRET/NOFORN~~

Classified by ~~Multiple Sources~~
Declassify on 5 Feb 86

~~SECRET/NOFORN~~

recent escape of 6 Americans with Canadian assistance has likely heightened the vigilance of the militants, although this may be a temporary phenomenon. The danger in the current situation is that the militants might believe that Iranians are willing to resolve the crisis without achieving the goal of the Shah's return, and more radical elements among them might push for action against the hostages, such as a show trial of one or several, and/or some form of punishment. Even if the government and/or Khomeini determine that the hostages should go free, the militants, or at least some of them, will not wish to comply. To give up the hostages is to reduce their influence to nothing, and may lead to the punishment of some of the captors. The hostages are the militants' trump card.

(U)
4. (C/NOFORN) There will likely be continued turmoil in the provinces in the coming months, which will further detract from the hostage situation and occasionally, from efforts to set up the new government.

(U)
5. (C/NOFORN) A factor which must be considered when discussing the above is that if Khomeini does die soon, all bets are off. There will be a strong possibility of even further chaos, the political struggle for control may get violent, and anarchy is possible. The militants will not likely obey any successor to Khomeini and will appeal to the "people" for guidance, which means in effect that the militants will have no master.

(U)
6. (C/NOFORN) To sum up, it appears to us that the current political turbulence in Iran will continue for the next several months at least. We see no quick solutions to the hostage crisis, which will wax and wane in the public eye as the militants are able to focus attention on it. The situation at the embassy appears to have been routinized, but we would not assume from this that the militants are any less vigilant.

1. The purpose of this paper is to examine political and strategic factors in an attempt to find possible solutions to the Iranian - American crisis and early release of the hostages within terms acceptable to both Iran and the U.S. Since our interests in Iran and the region extend far beyond hostage release or rescue, it is imperative that mutually acceptable solutions be found; these solutions should be found quickly or the U.S. will possibly lose the option for emergency rescue. As stated in the 25 Jan paper, we estimate that operational security can be maintained for two to six additional weeks. The disclosure by the news media that six Americans departed Iran with Canadian assistance will likely turn the media attention to rescue options for Americans held hostage. While we are working hard to maintain OPSEC the useful life of the rescue capability has probably been shortened, perhaps significantly.

2. The purpose of this paper is to examine political and strategic factors in an attempt to find possible solutions to the Iranian - American crisis and early release of the hostages within terms acceptable to both Iran and the U.S. Since our interests in Iran and the region extend far beyond hostage release or rescue, it is imperative that mutually acceptable solutions be found; these solutions should be found quickly or the U.S. will possibly lose the option for emergency rescue. As stated in the 25 Jan paper, we estimate that operational security can be maintained for two to six additional weeks. The disclosure by the news media that six Americans departed Iran with Canadian assistance will likely turn the media attention to rescue options for Americans held hostage. While we are working hard to maintain OPSEC the useful life of the rescue capability has probably been shortened, perhaps significantly.

3. Approach: Solutions must be mutually acceptable to Iran and the U.S. However, due to our longer term interests in Iran and the region, proposals by the U.S. must consider the geopolitical and strategic implications for other regional states, in particular Russia. Whatever is good for Iran and the U.S. is in

~~TOP SECRET~~

most important is to identify the options available to the U.S. in the context of near and long term interests of these nations. Following is our identification of Iranian, American, and Russian goals and objectives.

~~SECRET~~

In our assessment, Iranian and American goals and objectives are not dissimilar with the possible exception of the hostage issue. In only a very few instances Russian objectives are complimentary. If our assessment is reasonably accurate, the U.S. has at least an even chance of selecting a course which appears to accommodate most of the U.S. and Iranian political and strategic objectives. The accommodations could also blunt Russian objectives.

4. It would appear that the Iranian perception of the sincerity of the Iranians of our sincerity is beleaguered by a set of circumstances and "truisms" as perceived by the Iranians. Although we do not share the Iranian perception, it is necessary to understand them and work to correct them. following is our understanding of the situation:

a. Previous U.S. support of the Pahlavi Dynasty, judged by the Iranians to have been despotic, corrupt, etc. They demand at the least an "apology" from the U.S. - a U.S. recognition of its past mistakes. Many Iranians believe that for 2500 years foreigners have influenced Iran to its disadvantage. Many believe that the U.S. support of the Shah up to and during the revolution was so extensive and determined that the U.S. was strongly opposed to the formation of an Islamic Republic. Considering America's strength and commitment to the Shah, plus a perception of America's unsatiated imperialistic motives, the Iranians remain convinced that the problems of today's Iran are surely our doing.

b. Many Iranians, particularly religious leaders, believe that foreign influence and presence in Iran has seriously damaged the cultural and religious fibre of the nation. (The Shiite see the nation and Islam as synonymous.)

c. Based on the foregoing, Iran perceives that any relationship must guarantee independence from foreign influence. For example, they will not agree to security assistance which infers a commitment on their part nor will they request in the near term American DOD advisors, civilian or military. They will avoid economic commitment

... of Iran is a manifestation of our desire to see the current regime fail.

e. The Iranian bottom line to the U.S. is that since the U.S. has, as they see it, kept Iran in political, economic, religious, and cultural bondage, it is up to the Americans to demonstrate we have put the past behind us, recognize and demonstrate that we have accepted that we must have a relationship which is sincere, fair and based on a policy of non-interference.

f. Iranians distrust the Russians and hate Communism. Yet, the memory of Russian intervention is old compared to their perception of the U.S. They, the Iranians, under estimate the strength and intentions of the Russians and over estimate both for the U.S. They remain fearful that the U.S. has the power and intention to preclude establishment of the Islamic Republic.

5. Other factors to consider are:

a. The captors have added to the U.S. dilemma and the Iranian Government as well. We do not know their strength nor the source of it. Should we or should we not single them out as the culprits detrimental to U.S. - Iranian relations.

b. The current stage of elections adds to our problems. Should we or should we not work to approach the new President. If we do, will it brand him as pro-American or otherwise reduce his potential as a leader willing to work out solutions?

6. Obviously, the U.S. cannot satisfy all Iranian - U.S. objectives in the near term. Our approach and immediate objective should be to secure the early release of hostages which in turn should enable a more stable and favorable environment for longer term objectives.

~~TOP SECRET~~

...the perspective Iran and her objectives and find them, in general, acceptable to us. To the contrary, we probably should not publicly express the view that it is in Iran's best interest to recognize that Russia is her real threat vs the U.S. The Iranians may well believe we are trying to influence them on what is good or bad for them. They will not publicly admit that the Russian is a common enemy of Iran and the West for fear of appearing aligned with one superpower against another. Our general denouncements of Russia, plus those of the U.N. and Islamic Conference are sufficient for them to be on guard.

8. Following is a list of proposals for near term U.S. initiatives for consideration in addition to those underway in the U.N. or other channels. Most of them are overt, others not as apparent.

a. A high U.S. official should send a message to the Revolutionary Council congratulating them on the recent presidential elections. It should be in the context of another important step toward forming a government within the Islamic Republic and we look forward to good relations with the government. We wish them a speedy election of the Majelisi and a free and independent Islamic Republic. We need not and perhaps should not mention the President's name as it could serve to make him appear to our particular liking. Another attractive feature of this proposal is that it could come at a time that the Russians are becoming more critical of Iranian leadership.

b. We should send a message to Khomeini wishing him a speedy recovery. He is the head of state and most Iranians may well

~~TOP SECRET~~

appropriate... the message. We also suggest that U.S. religious leaders also follow suit.

c. We should immediately begin a campaign to convince Iran that the departure of six American diplomats from Iran and the manner of their departure was not intended to offend the Regime. Rather, we should express regret that it was necessary but we were concerned that they might fall into custody of groups who would further exacerbate the situation and work to make our mutual objectives even more difficult. To do otherwise will strengthen the Iranians perception of our capabilities and power once again took advantage of them and lead to cause resentment and bitterness.

d. The hostage issue: Iran and the U.S. appear to be at an impasse. There are some signs that release could be arranged short of the Shah's return. But the Iranians are not likely to compromise, no matter how much they may want to, until the U.S. "owns up to its past evil deeds." We obviously cannot own up to evil deeds not committed nor can we suggest return of the Shah. It is imperative, then that we generate and facilitate concepts which will convince the Iranians that the past era is dead, that we wish to demonstrate that we want a new relationship based on Iran's independence from the U.S. and non-intervention and are prepared to prove it. Our dilemma is how to implement a program without withdrawing adequate

~~CONFIDENTIAL~~

... Iran for release of the hostages. An equally
challenge is to implement a program short of confusing or
alienating the American public, and political and governmental
establishments.

There are several commodities which the U.S. controls
directly or indirectly, that Iran needs urgently, others not
as urgently. Some are: military spare parts, spare parts
for the petroleum industry, agricultural products, drugs
and medicines, Iranian monetary assists, and greater
recognition of Iran, specifically the Islamic Republic.

We should develop the thought that the U.S. can withhold
these commodities indefinitely without injury to the U.S.
In recognition of Iran's new republic, we agree to the release,
sale and recognition of commodities with small but important
commitment to continue to make the commodities available. This
could serve as an unstated recognition that we value our
relationships with Iran under the Islamic Republic to be as
or more important than the former regime. Further, we should
state that with the release and sale of the commodities, that
we prefer a new relationship which does not carry commitments
by the U.S. or Iran and only one provisio is required:
return of the hostages.

The manner and style of negotiations is vastly important
to the U.S. and Iran. On the one hand, it may be desirable to
initiate quiet and secret negotiations. On the other hand, Iran
might strive for open negotiations to publicly demonstrate
that Iran is equal to the U.S. and wishes to publicly "punish"

~~SECRET~~

...the U.S. begin with quiet negotiations through diplomatic channels. We should propose urgent but closely held meetings in Tehran. This could cause the Iranians to believe we are sincere and very much concerned by offering to come to Tehran under current security conditions. We should also be prepared to meet on neutral ground or in the U.S. This message to the Iranians can also be transmitted to Iranians through commercial, military, medical, agricultural and petroleum contacts - surely there are influential Iranians in these sectors who want desperately to see an end to the impasse.

e. The Captors: It is becoming increasingly clear that the captors will play a major role in not only the release of the hostages but also the safety of hostages from the time they are released until safely out of Iran. At this point, we do not know enough about them. We should expend immediately all efforts within our entire intelligence community to determine who they are, where and by whom trained and what connections they have to other groups in and out of Iran. We believe that they are supervised and governed by a higher structure outside of the compound which is sophisticated, has clear objectives and is highly disciplined. It is very unlikely that this group could have trained and organized itself and become so highly competent without strong and effective supervision. Their demonstrated performance within the compound including running the compound, orientation

~~TOP SECRET~~

dealing with Khomeini and the Councils at all levels. The hierarchy which develops and implements policy, strategy and tactics and in turn governs the captors.

There is evidence that some of the captor's objectives are not in concert with Khomeini's and the Revolutionary Councils. They apparently have short and long term goals. Within a relatively short period of known existence they have become a major political force in Iran and internationally. In a nation where strength is recognized, admired, and feared, they now approach, at least temporarily, a force equal to all political forces with possible exception of Khomeini. What direction and how much momentum they can develop, remains to be seen.

One may find some comfort from the captor's statements that they will release the hostages on Khomeini's order. We are concerned, however, that they may have privately communicated to Khomeini that he should not order them to do so. Depending on their power base and Khomeini's assessment of the situation, he may or may not order release.

Whatever the case, we should not suggest publicly that Khomeini does not have influence over the captors. Statements to this effect could encourage the captors to pursue their objectives, whatever their objectives may be, give the Iranians the impression we are meddling in their internal affairs and further aggravate Khomeini. We, therefore,

~~SECRET~~

should attempt to maintain the status quo. One of the factors involved in this is the internal security (OPSEC) for the Joint Task Force (JTF). News Media disclosure of the departure of six Americans from Tehran has increased our concern for OPSEC.

We propose that the U.S. begin an urgent and concerted diplomatic effort with the objective of bringing early release of the hostages, hopefully before OPSEC is compromised.

This paper: examines Iranians perceptions of the U.S.; examines Iran's conditions for renewed relations with the U.S.; lists Iranian, American, and Russian goals and objectives; and, suggests that the U.S. can determine a course which could lead to early release of the hostages, enhance our strategic interests in Iran, while at the same time blunting Russia's objectives.

We propose that through quiet diplomatic initiatives the U.S. recognizes the recent Presidential election, show concern for Khomeini's health, provide commodities needed urgently by Iran, demonstrate new regard for the Islamic Republic and Islam, send an envoy to Iran and learn far more about the captors. Each of these proposals is accompanied with rationale to support the initiative.

to pick out the impostors -- at least until we find out
just what about them.

f. Islam: The U.S. should take into full account Khomeini's
version of Shiite Islam. Khomeini's revolution was based
largely on Islam and the need for his style of Islam to be
instituted not only in Iran but also in other Moslem countries.
Since Shiite Islam considers religion and politics to be
complementary, it is important for us to understand it and
to recognize it in our overtures, negotiations and new
relationships. This will require a delicate balance in the
attitudes we project. While we should respect many features
of Islam, we must not give, for obvious reasons, credence
to the export of Iranian Islam to other nations in the
region. This approach will require care in our expressions
of the Russians reprehensible persecution of the Moslems
in Afghanistan. The connection between Shiite Islam and
the Moslem world need not necessarily be made.

IRANU.S.RUSSIA

Establishment of Islamic Republic.	Form of Government chosen by Iran as long as not Communist.	Islamic Republic OK for now.
- West elect majlis and appoint ministers.	- Support completion of Iranian process.	- Desire those to be elected to be anti West/American.
Perpetuation of Khomeini's version of Islam through revolutions if necessary.	Mute spread and attempt to direct Muslim attention toward Russia.	Blunt spread of new Islamic movement to prevent spread to Russia.
Political stability in Iran.	Political stability in Iran for near and long term.	Political stability in Iran for near term - turmoil should Iranian Government turn to West.
Continued oil and gas production with sale to West and East.	Continued production and sale of oil to West - neutral on gas to Russia.	Reduction in production and oil sale to West - can accept loss of attendant gas flow to Russia.
	Iran does not succumb to Russian Hegemony.	Keep pressures and political awareness of Russian might be for Iranians.
	Iran and Pakistan hold line against Soviet drive to warm water port.	Through Hegemony and more direct actions cause eventual collapse of Iranian and Pakistanian Governments - seek parties who invite Russian presence.

~~TOP SECRET~~

IRANIAN, U.S., AND RUSSIAN GOALS AND OBJECTIVES

<u>IRAN</u>	<u>U.S.</u>	<u>RUSSIA</u>
Return of Shah and wealth. - Hold hostages until real movement.	Hostage release. - Obtain release prior to loss of rescue option.	Continued U.S. - Iranian confrontation.
Non-interference by U.S. in Iranian affairs.	Good relations with Iran and non-interference in Iranian affairs.	Total and lasting break of U.S./Iranian relations.
Non-alignment	Non-aligned Iran	Anti west or at least a non-aligned Iran.
Free of dependence or influence of West and East. - Political: Not reliant on world opinion. - Foreign Affairs: No alliances or impediments. - Security Assistance: Receive purchased and purchase materials - no strings attached. - Economic: No political conditions for trade; free Iranian assets.	An independent and self sufficient Iran. - Political motives satisfy internal Iranian requirements. - Iran becomes good neighbor - aware of Soviets long-term interest. - Release and sell non-sensitive material with assurance it will not be transferred. - Even trade policy - no threat of impoundment of U.S. assets.	An Iran isolated from the West and increasingly under Russian influence. - Iranian politics recognize Russian Interests. - Iranians lay-off Russians. - Stop U.S. security assistance and sell Russian material. - Shift trade to Russia - little Iranian economic development.

~~TOP SECRET~~

General

1. Q. I understand the RH-53 is primarily used for minesweeping -- why was it used for a rescue mission?
- A. Shipboard compatibility, range, and lift capability made it the only helo in the US military suitable for this mission.
2. Q. Is the RH-53 the first generation of a helicopter type?
- A. No. The CH-53A was the lead aircraft.
3. Q. Have RH-53Ds been used to fly long distances before?
- A. Yes. RH-53 helos routinely make long distance transits. One of the helicopter's missions is to provide vertical onboard delivery (VOD) to ships at sea.
4. Q. How old were the RH-53's which were used? Were later models available that might have been used?
- A. They were 7 years old. Newer models were not available.
5. Q. What is the impact of the loss of these helicopters on US minesweeping capability?
- A. A total inventory of 30 RH-53D airborne mine countermeasures helos is now reduced to 23.
6. Q. How long had the helos and their maintenance crews been deployed on the NIMITZ prior to the mission?
- A. Maintenance crews and helos had been deployed on NIMITZ and KITTY HAWK for five months; flying crews for only four days. Helos did not routinely fly mission profiles.
7. Q. Were the RH-53 helicopters given the same attention as the other aircraft aboard the NIMITZ?
- A. Yes. As a matter of fact, the RH-53 helos received high level attention and high priority was placed on getting required repair parts to the NIMITZ.
8. Q. Why weren't additional RH-53's positioned aboard NIMITZ?
- A. The number of helos positioned aboard NIMITZ was considered to be adequate to support the mission.

~~SECRET~~

Execution of Mission

1. Q. If you launched eight capable RH-53s, how do you account for the fact that less than seven hours later you aborted because you only had five helos which were flyable?
 - A. The helo carrying contingency repair parts was unable to penetrate a severe sandstorm, because navigation and attitude, heading, and reference systems were inoperative. It returned to the aircraft carrier. A second aircraft made a forced landing with indications of a main rotor blade failure. A third aircraft developed hydraulic problems which could not be repaired without the repair parts.
2. Q. Why couldn't the helo that returned to the NIMITZ proceed to the fuel rendezvous despite the time lapse?
 - A. Approaching daylight rendered this option infeasible.
3. Q. Who was coordinating the departure of the aircraft when the decision was made to cancel the mission?
 - A. The ground controller ~~(with Delta forces)~~ directed parking, fueling and aircraft movements which was difficult because of deep loose sand.
4. Q. Why did a helo and a transport plane collide?
 - A. Extremely dusty conditions in total darkness degraded visibility during refueling operations.
5. Q. Why were two aircraft moving at the same time?
 - A. Only one of the aircraft was moving. The C-130 was stationary; the RH-53D was repositioning to take on additional fuel.

~~SECRET~~

~~Secret~~

- Q. Has this type of helo operated from aircraft carriers previously?
- A. Yes. This type of helo is used primarily for minesweeping and is usually operated from amphibious helicopter carriers when performing this type of mission.
2. Q. What type of ship does it usually operate from?
- A. It usually operates from amphibious ships (LPH, LPD) conducting minesweeping preparatory to amphibious landings.
3. Q. What is the usual mission radius of these helos?
- A. 250 miles without internal range extension tanks.
4. Q. How was the range extended?
- A. By adding internal range extension tanks which almost doubled the range.
5. Q. Was this a routine mission for this helicopter?
- A. No. The routine mission for the RH-53 is minesweeping.
6. Q. Were the RH-53s especially configured for the mission, i.e., was special equipment added?
- A. Yes. Two types of special equipment were added:
1. Long range navigation equipment (OMEGA and inertial navigation system (PINS)).
 2. Internal extended range fuel tanks.
7. Q. Did the helos operate within their design limits on the mission?
- A. Yes.
8. Q. Is the RH-53 capable of operating over terrain such as that found in Iran?
- A. Yes. As a matter of fact, the Iranian Navy purchased six RH-53Ds for their own use.
9. Q. Did the helos operate within acceptable environmental conditions on parts or all of this mission?
- A. No. An unexpected, severe sandstorm was encountered. The aircraft were in this sandstorm for approximately 3 hours.
10. Q. What effect does sand and dust and high altitude have on the RH-53?
- A. Sand and dust reduced crew visibility and affected their visual orientation. Altitude reduces performance, as it does to all helos.

11. Q. Were the helos configured to operate in a sandy environment -- was any special equipment added or were they designed for such terrain as the desert of Iran?

A. The aircraft has an engine air particle separator (EAPS) to prevent sand from entering the engines.

12. Q. How did the pilots and crewmen see at night?

A. Night vision goggles were provided for all the aircrew.

13. Q. Were these devices adequate?

A. Yes, under visual flight conditions, but the goggles induced severe vertigo in the sandstorm environment.

14. Q. Had they been designed for use in flying a helo?

A. They had been designed for use by infantrymen but were adapted for use by pilots flying a helo.

~~SECRET~~

Maintenance.

1. Q. Did failures occur during training rehearsals?
A. Yes, but sufficient helos were available to complete the training missions.
2. Q. What is the RH-53 operational ready rate for normal operations?
A. During the past nine months the mission capable rate has been: 45% in Airborne Mine Countermeasures (AMCM) configuration; 83% in Vertical Onboard Delivery (VOD) configuration. The VOD configuration involves long range delivery of personnel and equipment to or from ships at sea. This mission required VOD configuration.
3. Q. What were the types of failures experienced during training?
A. There were no unusual events or failures.
4. Q. Does the RH-53 have a history of maintenance problems?
A. Yes. The RH-53 has historically had a low availability rate. This is attributed to shortages of qualified maintenance personnel, unique deployment requirements, and the small size of the AMCM community (only about 30 helos).
5. Q. What were the specific material failures which occurred?
A. - A/C #2 experienced a failure of the 2d stage hydraulic system pump enroute.
- A/C #6 experienced a two (2) channel BIM indication and the loss of the 2d stage hydraulic pressure. These symptoms indicated imminent rotor failure.
6. Q. What parts with high failure rates were pre-positioned in the C-130? What maintenance personnel? What repair equipment?
A. None in the C-130. Parts were positioned in A/C #5. No extra maintenance personnel were positioned other than aircrew, who were qualified to perform routine maintenance tasks, including minor repairs.
7. Q. Was adequate supervision provided to the maintenance effort?
A. Yes.

~~SECRET~~

~~SECRET~~

8. Q. Who was assigned responsibility for maintenance support of the mission aircraft?
- A. CINCPACFLT was responsible for the overall support. HM-16 maintained the helos on board the aircraft carriers.
9. Q. What is the background and experience of HM-16 in helo support?
- A. Both the commanding officer and maintenance officer of HM-16 have extensive experience in support of RH-53D's.
10. Q. How was the maintenance effort coordinated?
- A. Special attention and highest priority were given by all levels of Navy command for repair and replacement parts.
11. Q. Was there adequate support equipment available -- intermediate level?
- A. Yes.
12. Q. Was there any indication of lack of support for these helos?
- A. No.
13. Q. Were there any shortages of qualified maintenance personnel?
- A. No.
14. Q. Who was responsible for parts support?
- A. CINCPACFLT
15. Q. What was the quality of parts received?
- A. All were ready for issue.
16. Q. What were the means and routing of parts delivery? Time?
- A. High priority air and sea delivery were provided.
17. Q. Was there a problem providing adequate replacement repair parts to the deployed helos?
- A. All known requirements were satisfied prior to the mission.

~~SECRET~~

18. Q. Did the helicopters carry spare parts?
A. Yes, the spares were in A/C #5, which returned to the carrier.
19. Q. What percentage of the aircraft were normally operational?
A. 85% were mission capable during the 30 day period prior to the mission.
20. Q. Why couldn't the crews land and perform the repairs?
A. Because all spare parts were aboard A/C #5, which returned to the carrier.
21. Q. Did you have any maintenance problems on the carrier?
A. Nothing significant that would indicate a maintenance trend.
22. Q. How frequently were RH-53's exercised, i.e., turned up or flown?
A. Daily for approximately 0.4 hours.
23. Q. How did the stringent security requirements affect the maintenance and supply support effort on the RH-53's?
A. Ground turn-ups and short duration flight impact on dynamic components which require longer flights than were performed on this mission. OPSEC further precluded movement of the aircrews to NIMITZ in sufficient time to provide them the amount of time they would have preferred to exercise the airplane they were scheduled to fly.
24. Q. Were the RH-53's completely ready for flight when they were launched?
A. Yes. All systems were thoroughly checked before the mission was launched.
25. Q. Did you receive any warnings concerning the ability of the RH-53 to support the mission?
A. No. The RH-53 with special equipment installed was considered to be sufficiently reliable for the type of mission flown.

SUBJECT: Psychological Operations Plan - Iranian Hostage Issue (S)

Commanding General
USAJFKCENMA
Fort Bragg, North Carolina 28307

1. (U) (S) On 8 February 1980, OJCS requested that the proposed National Strategic Psychological Operations Plan be expanded to include a sub-campaign to address the "captors." Specific objectives are:
 - a. (U) (S) Convince the captors to cooperate with Bani Sadr on the hostage issue.
 - b. (U) (S) Isolate the captors to eliminate their influence on the hostage issue.
2. (U) (S) Attached is a sub-campaign designed to convince the captors to release the American hostages. This particular sub-campaign is designed to be used as an integral part of the National Plan using the same methodology and format as the other sub-campaigns. Thematic material is compatible with and reinforces thematic material in the National Plan; however, this sub-campaign could be implemented by itself. This approach offers planners the flexibility of implementing this sub-campaign immediately without detracting from a more deliberate consideration of the National Plan and the concomitant recommendations for its implementation.
3. (U) (S) This sub-campaign is the only sub-campaign in the National Plan which includes recommendations for the use of "black and gray propaganda." These recommendations are justified by the critical nature of the hostage issue and its potential impact on US foreign and domestic policies.

~~SECRET~~

1. (U)
(S) Statement of PSYOP Objective (U)

(U)
(S) Convince militants occupying the US embassy in Tehran to release all hostages without harm.

2. (U)
(S) Definition of Target Audience (U)

(U)
(S) The militants occupying the US embassy in Tehran have demonstrated a high degree of revolutionary zeal, a continuing firm commitment to the position that the US hostages will not be released before the former Shah is returned to Iran for trial, and a relatively disciplined organization. The militants also have demonstrated a fairly sophisticated understanding of hostage-captor psychological dynamics, a keen appreciation of media manipulation for political advantage, and a willingness to confront Iranian political authorities. They have exploited the political leverage provided by their occupation of the US embassy to have ministers of state replaced, an ambassador recalled, and to exert considerable influence on the 25 January presidential election. It can be presumed that the political influence their status as captors has given them has convinced some of the militants to prolong the embassy crisis as long as possible in order to preserve their political influence. The group holding this conviction apparently dominates the "leadership committee" which governs the collective actions of the militants.

(U)
(S/NF) Despite the organizational discipline they have demonstrated and the apparent unanimity of their public statements and actions, the militants are not a homogenous group. Five general sub-groups with overlapping membership have been tentatively identified among the composite force occupying the embassy. These are theological students, university students, Revolutionary Guardsmen, Palestinian-trained Iranian activists and political leftists. The attitudes, perceptions, goals and ultimate loyalties of the sub-groups probably vary considerably. It is highly likely that the theological students, many of the university students and Revolutionary Guardsmen, and perhaps some of the Palestinian trained activists are committed primarily to the goals of the Shiite Islamic revolution in Iran. Most of the militants in this category are devoted to Ayatollah Khomeini as the possessor of both ultimate spiritual and temporal authority. They could be expected to obey Khomeini if he unambiguously ordered release of the hostages. Furthermore, because of their devotion to Khomeini and their commitment to Islamic revolutionary goals, these activists are potentially susceptible to appeals or demands issued by less revered political authorities holding positions approved by Khomeini and acting with his tacit, if not explicit, endorsement. The constitutionally-elected President of the Islamic Republic is one such political authority. The remaining militants probably hold little if any allegiance to Khomeini and the goals of the Islamic Revolution. These leftist militants could be

~~SECRET~~

~~SECRET~~

expected to resist and perhaps to defy orders issued by either political officials or Ayatollah Khomeini to release the hostages. The leadership committee which directs militant activities at the embassy is dominated by the more radical or intransigent elements among the militants and may be dominated, although this is not certain, by leftist elements holding no real allegiance to Khomeini.

(U)
(C) While it is extremely unlikely that a summary execution of any hostage will occur, this radical element may contain a few individuals willing to resort to such extremes if the militants become totally isolated from the Iranian people and government. Such actions would clearly separate the radical fringe from the other captors and the Iranian government. The government would no longer be an appropriate target, but an excellent opportunity would arise for the US to call for retribution against the executioners in particular and condemnation of terrorism in general.

(U)
(C) 3. Statement of Themes (U)

a. (U)
(C) The embassy occupation is isolating the militants from the Iranian Revolution. As a collective unit, the militants are extremely vulnerable to loss of the public support and the consequent political influence their seizure of the embassy has generated. Public sympathy and support of their activities are the most important conditions which have allowed the militants to develop and exercise political influence. All of the militants are vulnerable to the loss of this support. Those sincerely devoted to the Islamic Republic and Khomeini are further vulnerable to the adverse ramifications the embassy occupation may have for ultimate international acceptance of the Republic. The criticality of the militants' vulnerability to isolation from public support makes them highly susceptible to this theme, if there is convincing evidence that the theme accurately reflects political reality.

b. (U)
(C) Continuation of the hostage crisis contributes to conditions threatening the survival of the Islamic Revolution. Those militants loyal to Khomeini and the goals of the Islamic Republic are vulnerable to loss of the successes the revolution has achieved. Growing domestic instability and the increasing threat of Soviet intervention both carry the potential to overthrow the Islamic revolutionary leadership and to replace the Islamic Revolution with one seeking different political goals. To the extent the Khomeini devotees perceive these vulnerabilities, they will be susceptible to this theme. Leftist elements among the militants having little or no commitment to Islamic goals are not subject to the same vulnerabilities and, in fact, probably would welcome further turmoil in Iran as improving conditions for a second, leftist, revolution. Consequently, the leftists are not susceptible to this theme.

~~SECRET~~

~~SECRET~~

c. (U) (S) There are a variety of legal and internationally accepted methods for airing the legitimate grievances of the Iranian people. The militants are vulnerable to the loss of public support and their own ability to guide the Revolution toward those idealist goals which initially motivated their occupation of the US embassy. In addition to the idealistic motivations, the captors generally are driven by three very primal needs. First, they have an intense fear of the Shah's return to power or the reimposition of a foreign (read US) "satanic" puppet. Secondly, the captors are driven by greed in terms of the exported Shah's wealth. Finally, they have a sense of vindictive responsibility to punish and humiliate the Shah, his supporters and the US. Accordingly, the captors are susceptible to themes which emphasize these vulnerabilities while also offering means through which the militants can retain a vanguard, or at least influential, role in the revolutionary process. Themes addressing the aforementioned vulnerabilities/susceptibilities would have little credibility if they appear to be originating from a US or US influenced source. Therefore a "gray propaganda" effort would be most effective.

d. (U) (S) The US respects the goals of the Islamic Revolution and the desires of the Iranian people. The vulnerabilities of the militants are those previously described. Under conditions prevailing on 9 February 1980, the theme of US respect for Islamic/Iranian goals does not directly exploit any of the militants' vulnerabilities and, consequently, is not a theme to which they are susceptible. However, other groups within the Iranian population that possess the potential to influence the perceptions of the militants are susceptible to the theme. Furthermore, the militants can be expected to become increasingly susceptible to the theme, as justification for accepting a compromise resolution of the hostage situation, if they become convinced that the hostage crisis must be resolved either to preserve their own political influence or to protect the achievements of the Islamic Revolution.

4. (U) (S) Effectiveness (U)

(U) (S) As a collective entity, the militants are capable of effecting the release of all hostages without harm by deciding to do so. However, such decisions appear to be made for the total group by a leadership committee dominated by the more intransigent element among the militants. This group probably will attempt to prolong the hostage crisis in order to preserve its own political influence. Militant efforts to avoid compromise solutions and to prolong the crisis can be anticipated to continue until the intransigents perceive that further prolongation of the crisis threatens to convert public support for their activities into alienation or hostility that will eliminate their political influence.

~~SECRET~~

~~SECRET~~

5. (U) Accessibility (U)

~~(S)~~^(U) Aggressively seeking to influence, if not control, political events in Iran, the militants are highly attuned to all media that indicate the current status of their role in the political arena. Avid consumers as well as manipulators of the domestic broadcast media, the militants are highly accessible through these media. The militants also can be expected to closely follow external broadcasts that provide information, not available in the increasingly controlled domestic media, concerning the impact of their own activities on other political participants, government intentions, and public reactions to both their own and government activities. These also can be carried effectively to component elements among the militant group by influential individuals and groups in Iran. Such people and groups include Ayatollah Khomeini and his representatives, government officials, members of Iran's Revolutionary Council, seminary students in Qum, university students in Tehran, Revolutionary Guard leaders and cadre, respected religious figures, members of Iranian leftist groups, representatives of various Palestinian nationalist groups (notably the Popular Front for the Liberation of Palestine and Fatah), and activists of the communist Tudeh Party of Iran. More general population groups, such as the intelligentsia, the bazaaris and the unemployed lower economic class, also are capable of conveying generalized themes to the militants through personal contact or public displays, such as wall graffiti, speeches and public demonstrations.

6. ~~(S)~~^(U) Conclusions (U)

a. ~~(S)~~^(U) Most Lucrative Target Audience: The militants are a particularly resistant target audience for themes related to hostage release. However, the Khomeini loyalists and other religious devotees will be more susceptible to themes related to release of the hostages than will be the leftists. The leftists, while more resistant to hostage-release themes, will be more effective in ultimately orchestrating release of the hostages than will be the religious devotees.

b. ~~(S)~~^(U) Most Productive Themes: Growing isolation will be the most productive theme directed at the militants as a total group. Of equal productivity for the Khomeini loyalists only will be themes emphasizing the dangers posed to the Islamic revolution by prolongation of the embassy crisis. The theme emphasizing the pragmatic utility of a compromise solution will be productive only when a sense of growing isolation from public support has been engendered in the dominant intransigent element among the militants. Themes emphasizing US respect for Islamic values and the Iranian people will be effective with influential intermediate target audience among the Iranian population but will not by themselves alter the perceptions of the militants.

~~SECRET~~

~~SECRET~~

c. ^(U)~~(S)~~ Most Productive Media: An unambiguous public statement by Ayatollah Khomeini provides the single most effective medium. Short of such a statement by the Ayatollah, no single medium can be considered particularly more productive than others. A combination of all media does have the potential to convincingly carry desired themes to the militants.

d. ^(U)~~(S)~~ Anticipated Impact: By themselves, psychological operations offer little probability of successfully altering the perceptions and behavior of the militants holding the hostages. However, appropriate communications can both encourage Iranian government authorities to attempt to resolve the hostage situation and provide significant support to Iranian officials in their efforts to resolve the situation. A combination of Iranian government efforts, US diplomatic support for those efforts, and the projection of themes related to hostage release to both the activists and intermediate target audiences, does have the potential to reduce the current political influence of the activists, isolate the activists from public support, and eventually convince the activists that a compromise solution provides greater advantages for them than would a prolongation of the crisis.

~~SECRET~~

~~SECRET~~

1. (U) Statement of PSYOP Objective (U)

(U) Convince militants occupying the US embassy in Tehran to release all hostages without harm.

2. (U) Definition of Target Audiences (U)

a. (U) Ayatollah Khomeini: Khomeini remains the ultimate legitimizing force for political activities in Iran. He views political affairs primarily in moralistic terms and relies for practical advice, as well as for daily implementation of policy, on a circle of advisors within the Revolutionary Council and, since 25 January 1980, on the elected President of the Islamic Republic. Although Khomeini has endorsed the militants' position that the US hostages will not be released until the Shah is returned to Iran for trial, he is capable of reversing his position and ordering a release of the hostages, if given a face-saving method of doing so.

b. (U) President Abul Hasan Bani-Sadr: Bani-Sadr, the elected President of the Islamic Republic, is the only Iranian official besides Khomeini whose position is legitimized by the new constitution. A de facto political exile from the Shah's regime, Bani-Sadr spent fifteen years in France, where he eventually joined Khomeini's circle of advisors. An ardent anti-imperialist and critic of US involvement in Iran, Bani-Sadr portrays himself as a true revolutionary and leftist. As acting Foreign Minister during most of November 1979, he refused to open direct negotiations with the US to resolve the hostage situation but nevertheless took the position that the hostage seizure had been a spontaneous but mistaken incident that should be terminated as rapidly as possible without the use of force. His previous statements indicate that he probably views his presidential responsibilities as a balancing act in which he must on one hand retain Khomeini's confidence, public support and his own ascendancy over political rivals in both the Revolutionary Council and the larger political arena, while on the other hand taking positive measures to establish an effective "revolutionary" government and solve Iran's pressing foreign and domestic problems.

c. (U) The Revolutionary Council of Iran: While some members of the Revolutionary Council appear to view political affairs primarily from the same moralistic basis as Khomeini, other members take a more pragmatic position on specific issues. The Council has in the past persuaded Khomeini to reverse his publicly-announced position on specific issues. A perception that either domestic instability or foreign hostilities seriously threaten the survival of the Islamic Republic could provide pragmatically oriented members of the Council with sufficient rationale to convince Ayatollah Khomeini to order release of the hostages.

~~SECRET~~

d. (U) Religious leaders (mullahs): Combining spiritual with political leadership, the mullahs give pre-eminence to spiritual values and to the necessity of following Shiite Islamic precepts in political life. However, they are highly politicized and are intimately involved in political affairs.

e. (U) University and theological students: Many of these students are both deeply religious and fervently committed to the revolutionary goal of establishing a Shiite state. They continue to be revolutionary activists and have constituted an important source of public sympathy and vocal support for the embassy militants.

f. (U) Revolutionary Guards: Primarily youthful, zealous, and at least initially motivated in significant degree by religious commitment, these guardians of the Revolution have cooperated closely with the militants and have provided at least a portion of the militants' numerical strength. Guards representatives may also be prominent members of the militants' leadership committee.

g. (U) Bazaaris and middle class: The bazaaris can be categorized as both deeply religious and strongly motivated by economic and profit considerations. The middle class generally believes that religious devotion can be compatible with Western life-styles and methods. The middle class is concerned primarily with political freedoms and living standards.

h. (U) Militant Iranian leftist organizations: Although some of the militant leftist organizations in Iran have contributed members and perhaps leaders to the occupation group at the US embassy, other leftist groups apparently have been barred from the embassy compound by the occupying militants. At least one organization loosely associated with the "Islamic-Marxist" Iranian Peoples Strugglers (Mujahidin) appears to be represented among the militants, although the tightly organized and ideologically cohesive Mujahidin itself may not be. While the leftists among the militants appear to draw support from their families and from associates with similar beliefs, they also appear to be the objects of resentment and passive opposition from other leftist groups. Lack of convincing information about the leftists at the embassy, coupled with historic rivalry among leftist groups in Iran, make the leftist organizations outside the embassy compound difficult to assess as target audiences. Generally, these groups advocate the revolutionary establishment of a classless, socialist state and portray themselves as the vanguard of the anti-imperialist struggle in Iran. Some of the significant groups couple fundamentalist Shiite principles to their socialist ideology.

~~SECRET~~

i. (U) (S) Palestinian Liberation Organization (PLO): Some of the embassy militants almost certainly have personal links with PLO groups. George Habbash's Popular Front for the Liberation of Palestine (PFLP) is the Palestinian organization most likely to have had past and perhaps continuing ties with at least some of the militants. It is also possible, although not substantiated, that a number of the militants could have past associations with a Shiite militia organization in Lebanon, the Amal, which occasionally has cooperated closely with various Palestinian factions. The organization and conduct of the militants at the embassy indicates that at least some of their leaders have been associated with or trained by experienced guerrillas, possibly a Palestinian organization. Palestinian groups are interested primarily in advancing the Palestinian nationalist cause. Although other considerations are secondary, some Palestinian groups, notably the relatively moderate Fatah of Yasir Arafat, have involved themselves in diplomatic initiatives of virtually every nature in order to attract support for their nationalist cause.

j. (U) (S) International Islamic groups: These organizations attempt to promote the mutual interests of their members by gaining greater recognition for Islam in the world community and by promoting Islamic values within member states. They exercise some political influence and can be manipulated if they perceive the hostage situation as detrimental to Islam.

3. (U) (S) Statement of Themes (U)

a. (U) (S) The hostage crisis contributes to conditions threatening the survival of the Islamic Revolution. Both the president and the Revolutionary Council are in the process of consolidating a tenuous hold on political authority and are acutely conscious of their vulnerability to both internal and external developments that might precipitate either domestic disturbance or foreign interference. They are susceptible to all themes depicting potential dangers to the regime. The mullahs have returned to political influence as a result of the Islamic revolution and are vulnerable to the erosion of this hard won position. They are susceptible to themes articulating the possibility that revolutionary failure will submerge their own position and the influence of spiritual values on the life of the country. To the extent they are committed to both the spiritual and political goals of the Revolution, the students, seminarians and Revolutionary Guardsmen are vulnerable to the loss of these idealized goals as a result of revolutionary failure. They are potentially susceptible to themes announcing realistic threats to the goals of the Revolution. The bazaaris and middle class are vulnerable to the deterioration of economic prospects and living conditions that would accompany further political instability or foreign hostility. They are susceptible to the theme that continued confrontation with the US may be exacerbating domestic and international difficulties. Iranian leftist groups and Palestinian fellow

~~SECRET~~

~~CONFIDENTIAL~~

travelers are not susceptible to this theme, as in most cases they are pursuing differing goals through the convenient vehicle of an Islamic revolution.

b. (U) (C) The hostage crisis strengthens the political effectiveness of groups with no allegiance to the Islamic Revolution. Bani-Sadr and the Revolutionary Council are vulnerable to a reduction of their political influence caused by the competing influence exercised by the militants. The militants and other political pressure groups challenge legitimacy of the emerging constitutional regime, prevent it from attracting support through resolution of the social and economic difficulties besetting the nation, and threaten to undermine its ability to consolidate itself as a government-in-being. The president and the Revolutionary Council also are vulnerable to a further deterioration of Iran's status in the international community. They are aware already that Iran's status as a responsible nation state and the Islamic Republic's image as a rational and civilized government has been damaged by the intransigence of a small group of student activists. They are acutely aware that their failure to deal effectively with this group will precipitate further damage. They are vulnerable to themes emphasizing the inevitability of unhappy consequences, because both a measure of their continuing domestic legitimacy and their access to the forums in which they can reconstitute Iranian responsibility and status depend upon international support.

c. (U) (C) The embassy militants do not respect or represent the desires of the Iranian people. All of the target audiences that support, actively or passively, the goals of the Islamic Revolution in Iran are vulnerable to counter-revolutions or other political developments that could place desired goals beyond even potential attainment. Other Islamic states, and consequently international Islamic organizations, are vulnerable to secular, and particularly communist, exploitation of Iranian domestic turmoil. The fear of communism, regarded as the antithesis of religious value, coupled with a renaissance of Iranian xenophobia make this theme appropriate for use as "black propaganda." The related suggestion of self-serving factionalism on the part of the militants echoes and reinforces themes in use by the emerging constitutional leadership. The prevalence of factionalism and self-interest among Iranian political groups of all orientations makes all target audiences vulnerable to this suggestion. The sub-theme which stresses the incalculable damage that militant activities are working upon Islam is directed primarily at religious leaders and exploits a critical susceptibility already sensitized by the Iranian experience at the recent Muslim conference.

d. (U) (C) The US respects the goals of the Islamic Revolution and the desires of the Iranian people. The vulnerabilities of all target audiences

except the leftists, Palestinians and Islamic organizations are those discussed previously, with one addition. Each target audience also is vulnerable to the psychic and social disorientation produced by rapid Westernization and the uncontrolled encroachment of Western culture. The target audiences will be susceptible to this theme only to the extent that the US demonstrates a willingness to concede, at least partially, to Iranian political demands and to accept restrictions on its economic and cultural penetration of Iran. To be effective, the theme must be supported by actions that convince target audiences of a US willingness to cooperate with Iran on terms that are fully acceptable to Iran. Even given the necessary and appropriate supporting actions, however, this theme will have low credibility among virtually all target audiences. It is necessary as an anodyne which will form a neutral background to the sharper persuasive/coercive themes.

4. (U) Effectiveness (U)

a. (U) An unambiguous statement by Khomeini ordering release of the hostages would be the single most effective influence on the militants. Most if not all of the militants probably would obey such an order. Militants refusing to obey would be able to generate little public support for their defiance.

b. (U) Bani-Sadr probably remains capable of influencing, although not of dominating, Khomeini's political views and thus potentially is capable of persuading the Ayatollah to order release of the hostages. As a president with Khomeini's tacit endorsement, he is potentially capable of depriving the embassy militants of much of their current political influence and possibly of forcing them to accept a compromise solution to the hostage situation. His ability to fully realize this potential will be determined primarily by political developments in Iran.

c. (U) Individual and factional struggles for pre-eminence apparently characterize much of the Revolutionary Council's activity and limit its overall effectiveness. However, the Council remains the highest decisionmaking body on the Iranian political scene. If convinced of the pragmatic necessity of doing so, the Council is capable of rendering significant support to Bani-Sadr in his efforts to undermine the influence of the embassy militants and to impose a compromise solution to the hostage situation. The Council also controls or supervises all of the Iranian mass media and is capable of employing this vehicle and other means to generate public support for its policies.

d. (U) The mullahs provided an important medium of communication as well as an effective focus for mobilizing public sentiment and organizing public action during the anti-Shah revolution. Their political effectiveness and their ability to channel public perceptions remain intact. A decision by

~~CONFIDENTIAL~~

Khomeini or by the lesser ayatollahs on the Revolutionary Council to isolate or limit the influence of the embassy militants could be effectively translated into public action by the mullahs.

e. (U) (C) A lessening of the support currently provided the militants by the university and theological students would contribute meaningfully to generating perceptions of isolation among the militants. A conversion of the students' current support to even passive opposition would be a more significant contribution to perceptions of isolation by the militants.

f. (U) (C) Any lessening of the Revolutionary Guards' cooperation and support would contribute significantly to isolating the militants from external support.

g. (U) (C) The potential effectiveness of Iranian leftist groups in promoting desired objectives is minimal. Increasing opposition from rival leftists probably would have little effect. Withdrawal of support by sympathetic groups would be more significant, but probably could not be disassociated meaningfully from withdrawal of general public support.

h. (U) (C) The bazaaris and middle class, while possessing little if any ability to directly influence the militants, are capable persuading Bani-Sadr and the Revolutionary Council of the continuing urgency of solving the hostage crisis.

i. (U) (C) Although one or more radical Palestinian factions may exercise influence with some of the militants at the embassy, the extent of that influence is not known. It is quite likely, however, that whatever influence these factions possess would be exerted toward retention of the hostages and prolongation of the crisis. There is no evidence that Fatah, the comparatively moderate Palestinian organization of Yasir Arafat, exercises any direct influence with the embassy militants. Fatah does have the potential to act as an intermediary between the US government and Iranian authorities, but its effectiveness in such a role probably would be no greater than that of a "neutral" Muslim state such as Pakistan, Turkey or Algeria, or than that of an international organization such as the United Nations.

j. (U) (C) The international Islamic organizations, and their member states, can effectively convey to Iranian leaders the positive or negative reactions of the international community to events in Iran. These groups contribute to the international community's generalized ability to encourage or discourage specific policies of the Iranian government.

5. (U) Accessibility (U)

(U) ~~(S)~~ All Iranian target audiences remain highly active participants in the revolution which Iran continues to experience. As a consequence, each target audience is highly sensitized to all media of political communication. Each target audience actively seeks information from all available media. No single medium by itself, however, is capable of altering or significantly influencing the perceptions of any of the target audiences. The opinions and advice of trusted leaders, and particularly of Ayatollah Khomeini, are the most credible sources of information. However, even the persuasiveness of trusted leaders is not absolute. Repetition (and implicit corroboration) through multiple sources is the only effective method for altering the perceptions and behavior of the target audiences.

6. (U) ~~(S)~~ Conclusions (U)

a. (U) ~~(S)~~ Most Lucrative Target Audience: No single target audience is conspicuously lucrative in isolation. The cumulative influence of all target audiences does provide the possibility of success.

b. (U) ~~(S)~~ Most Productive Theme: The most productive general theme for all potentially effective target audiences is that the hostage crisis is contributing to conditions, both domestic and external, that threaten the survival of the Islamic Revolution. Individual target audiences are best galvanized through use of tailored versions of this general theme.

c. (U) ~~(S)~~ Most Productive Media: No single media can produce the results desired, but a combination of all available media does have the potential to generate desired perceptions.

d. (U) ~~(S)~~ Anticipated Impact: The messages have the potential to convince the Iranian regime that its continued existence is threatened by domestic and foreign conditions and that the challenge presented by these conditions can be met only by peacefully resolving the hostage crisis. If this perception achieves ascendancy, the regime will undertake necessary domestic action to isolate the militants, turn public opinion against them and eventually force them to release the hostages as part of a compromise solution.

1. NATIONAL OBJECTIVE: Gain release of all hostages without harm.
2. NATIONAL PSYOP OBJECTIVE: Convince militants occupying the US embassy in Tehran to release all hostages without harm.
3. TARGET: Militants occupying the US embassy.

MFF

Subject: JCS Printing Requirement,
18-22 Apr 50

1. On 15 Apr 50, the undersigned was alerted by JCS personnel to a potential printing requirement involving an unclassified but highly sensitive item. Printing would involve an unusually large quantity of a non-MCQG item.

2. On 16 Apr 50, I discussed the requirement with the Dir, HPL and a limited number of HPL personnel. I also advised the Dir DMA and sought his guidance relative to accepting the job since it was outside DMA's normal mission. The Dir DMA agreed that in view of the circumstance, we should accept the requirement.

3. On 17 Apr 50, the copy was received at HPL and preparations were made to do the necessary camera, negative engraving and platemaking in order to start printing during the night. Printing was started as scheduled and completed mid-afternoon Saturday while finishing operations were in progress. [REDACTED] the JCS representative was alerted to a possible change to the product

which would require a new printing. He then departed for the Pentagon to get involved in the decision. At about 1730 hours, he phoned HTC and advised that a second printing would be necessary. The problem was the lack of a qualified linguist to do the necessary translation of the new version. We offered to try and find the one HTC person who had the capability and [REDACTED] gratefully accepted. He arrived back at HTC around 1730 hours. The linguist arrived shortly thereafter and work was started on the new version.

4. By mid-afternoon 20 Apr 80, printing of the second version was complete. Finishing operations and packaging were complete by late afternoon. Transportation arrangements were made and plans for destruction of the first version were initiated. Project was considered virtually complete at this time.

~~SECRET~~

~~SECRET~~

5. AT about 1500 hours 21 Apr 80,
Dir DMA was informed that
yet another change had been
made at high level and
that we would have to
print again, but a reduced
quantity. People were called in
and preparations were made
for a third printing. Repr
materials had been destroyed,
so it was necessary to
start from scratch. Work
continued through the night
on a crash basis, and the
project was finished at
about 0800 hours, 22 Apr 80.
Due to the time urgency
arrangements were made
for a helicopter to pick up
the finished job at HTC and
deliver it to the next
trans-shipment point. Helicopter
departed HTC at 0935 hours
22 Apr 80.

CONCEPT FOR PSYOP INITIATIVE WITH NSC

I. ISSUES:

- A. Bring PSYOP CONPLAN to the attention of NSC.
- B. Advise NSC to form intelligence coordinating body on PSYOP/international information.

II. OBJECTIVES:

- 1. Provide the Executive Department with a comprehensive concept plan for employing PSYOP capability to accomplish US foreign policy objectives in the Middle East.
- 2. Initiate action to establish a standing national-level inter-agency PSYOP/international information coordinating group to deal with current and future contingencies.

III. DISCUSSION:

- Both issues are inter-related and can be mutually reinforcing.
 - Issue A: Time-sensitive
 - Issue B: Longer-range project
- The two issues can be treated together or separately.
- There are several alternative approaches to accomplish the above objectives.

IV. ALTERNATIVES:

1. Forward PSYOP CONPLAN to NSC through appropriate channels for the consideration by the NSC Staff and through NSC, for the consideration and staffing by USG agencies concerned (USICA, CIA, STATE, and BIB).

a. With recommendation that a national inter-agency coordinating body be formed:

- For one-time action: implementation of the PSYOP CONPLAN; or
- Standing group to deal with current and future contingencies.

Declassified by:
DDO NMCC
12 Apr 92

Classified By: JCS
Declassified ON: OADR

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~

b. Without recommendation to form an inter-agency coordinating group, but only to consider the CONPLAN as a one-time action (single - contingency action).

- Under this excursion to Alternative No. 1, the request for considering the establishment of a national coordinating body would be a separate Joint Staff action, if deemed required.

2. Establish linkage between the requirement for inter-agency PSYOP coordinating body and the ongoing action on "Perception Management."

3. Pattern the proposal for inter-agency PSYOP coordinating group after the proposed coordinating group on "Perception Management" with or without the provision for eventual consolidation under "one umbrella" of "Perception Management."

V. BEST COURSE OF ACTION:

- Alternative No. 1: Forward CONPLAN to NSC for consideration.
 - Not recommend formation of an inter-agency coordinating work group.
 - REASON: Time-sensitive nature of the CONPLAN.

VI FORWARDING CONPLAN TO NSC:

The following methods of forwarding CONPLAN to NSC can be considered:

- Formal: Memorandum from CJCS through D/ISA to SECDEF to NSC.
- Informal: Asst to CJCS -
 - Provide selected NSC staff members CONPLAN for information.
 - Table CONPLAN at NSC meeting.
 - Offer as a discussion item at NSC.

SPECIAL PSYCHOLOGICAL ASSESSMENT--IRAN

PURPOSE. This assessment is intended to provide an interim update to the existing Basic Psychological Operations Study (BPS) on Iran, which is scheduled for reissue during CY 80. The emphasis in this assessment is on major psychologically exploitable issues and associated target groups; no attempt has been made to provide a detailed update on each section of the BPS. The cut-off date for research on this assessment was 5 Dec 79.

General. Events in Iran during 1979 can in a sense be said to have culminated in the constitutional referendum held on 2 and 3 December. This election resulted in the official adoption of a 175-article statement of principles for an Islamic Government, as well as giving formal recognition to the Ayatollah Khomeini as leader of the Iranian revolution. The leadership of the Islamic Revolutionary Council (IRC) had looked to this dual achievement as their primary objective since the early days of the Provisional Government. All that now remains to complete the institutional edifice is to hold elections for the new National Consultative Assembly (Majlis) and President, and to install a new government. It is planned that these steps will have been achieved by the beginning of the new year (21 Mar 80).

In reality however, events in Iran have been dominated by the inability of any single individual or group both to consolidate power and to use it effectively to rule Iran. While the Ayatollah Khomeini remains the major popular figure of the revolution and is thus able to command widespread support for his policies, independent centers of power have proliferated and are now engaged in free-wheeling battles over ideology, policy, and control of key positions within the government. A major test of the durability of the new regime is whether a clergy-based government will be able to perform adequately without having to rely on the "liberal bourgeois" National Front technocrats (thus raising the kind of conflicts that ultimately led to the fall of the Bazargan government). Thus far, governmental paralysis due to internecine power struggles and the effects of the revolution itself on Iran's governmental bureaucracy--both exacerbated by a confrontation with the US over the hostage issue during November and December 1979--has meant that the aims of the revolution have been realized by no significant group in Iranian society (with the possible exception of the Mullahs).

ISSUES. The overriding issues currently discernible in Iran tend to fall into two major groups: (1) those involving the nature and institutional framework of the Iranian polity, which have in large measure been articulated within the context of the draft (now approved) constitution; and (2) those involving the actual performance of the revolutionary regime.

CONSTITUTIONAL ISSUES. The most important issue is that of the position of minority peoples within the Iranian state. Certain groups not only are

~~SECRET~~

~~SECRET~~

ethnically (i.e., language and customs) different from Persians, but are also Sunni rather than Shiite Muslims and have long histories of separatist tendencies: the Kurds, Baluchis, Gulf Arabs, and Turkomen. The official recognition of Shia Islam as the state of religion, a requirement that all school texts be in Persian (Farsi), and a complete lack of any provisions for regional autonomy in the proposed constitution led leaders of all of these groups to call for a boycott (apparently effective) of the constitutional referendum. The Kurds have been in armed conflict with the Revolutionary Government during most of the past year, while the other groups have only been involved in relatively localized, sporadic incidents of violence. Because of their location in the major oil-producing area of Iran and their heavy involvement in the oil industry itself, as well as their affinity with Iran's traditional rival, Iraq, the so called "Gulf Arabs" constitute the most potentially explosive problem for any central government in Iran.

A related problem is posed by the Azeris, the predominant ethnic group in Azerbaijan. Although Shiite Muslims, the Azeris are culturally and linguistically distinct from Persians. Additionally, they have a recent history of autonomous rule (during and immediately after the WWII Russian occupation of northern Iran) and furthermore tend to look to the religious leadership not of Ayatollah Khomeini, but of Ayatollah Shariat-Madari (who has expressed serious reservations concerning the new constitution).

Another major constitutional issue involves the role accorded to the Shiite clergy under its provisions. Briefly, the constitution grants what could theoretically become dictatorial powers (including supreme command of the armed forces) to a leading religious figure--under the circumstances obviously Ayatollah Khomeini. Carried to its extreme, this objection becomes an attack on the entire concept of the religious basis of the state. Rather than take such an approach, however, most secularly oriented groups have emphasized inconsistencies and deficiencies in the constitution which need to be remedied. Ayatollah Shariat-Madari's Azeri-based "Muslim People's Republican Party" focused its objections on the one-man rule aspect, while the "National Front" (which represents the bulk of the Iranian "liberal bourgeois") on this issue limited itself to pointing out the need to correct the contradiction between elective and appointive elements within the governmental structure.

Secularist groups also attack the constitution because of its lack of basic individual and social rights (freedom of expression and association, equal rights for women, etc.) and because its rudimentary representative organ is accorded virtually no real power. By far, the most extensive critique of the constitution from a secularist perspective was that issued by the "Jurist Association of Iran." Although this secularist attack on the clerical regime does not have a broad appeal throughout Iranian society as a whole, it does enjoy real significance within several potentially important groups, including professionals and intellectuals, civil servants

~~SECRET~~

~~SECRET~~

(among whose ranks are to be found the vast majority of educated working women), military officers, and expatriate Iranians living in Europe and the United States.

Disguised as a constitutional issue, but in reality a Marxist attack on the class basis of the clerical regime, are a number of criticisms which fault the constitution for such items as: (1) not outlawing capitalism, (2) not providing for a thoroughgoing land reform in which each peasant would acquire some kind of right to land, (3) not taking sufficiently stringent measures against foreign economic domination, and (4) failure to accord decisionmaking roles to worker's councils. The Jurists' critique cited above, as well as that of the "Socialist Worker's Party" and the "Iran Today" group followed this general approach in their opposition to the economic features of the new constitution. When focused on the constitution per se, these issues will evoke little response from significant Iranian groups. However, when articulated as critiques of government policies and programs, they become highly exploitable.

Surprisingly, the Tudeh (Masses) party, which had been calling for implementation of measures like these, called for a "yes" vote in the referendum. Although it would be tempting to explain this position in terms of Tudeh's Soviet ties and the anti-American rationale for its support of Khomeini, it appears that a more fundamental explanation involves tactical considerations of domestic Iranian politics. Specifically, Tudeh probably calculated that under the new constitution, leftwing parties will be repressed. By jumping on the clerical bandwagon (Tudeh head Kianuri has even touted Khomeini's son Ahmad for President), Tudeh hopes to survive the purge and thus to consolidate its hold over the left wing.

REGIME PERFORMANCE. The clerical regime is under heavy criticism for a series of economic difficulties, including most prominently (1) very high unemployment--particularly among young men, (2) rampant inflation, (3) shortages of foodstuffs and other necessities (such as pharmaceuticals), (4) failure to get social welfare and construction projects moving, and (5) lack of programs in land reform and aid to agriculture. These problems, as well as the negative impact of the revolution on bazaari interests, have resulted in a falling away of some support for the clerical regime and an increase in demands that those who seek authority should then take responsibility for accomplishing the tasks of government.

Perhaps the most significant political critique of the clerical performance involves its failure to purge the bureaucracy, the military, and the newly renovated security apparatus. Although couched in terms of revolutionary zeal, anti-Imperialism, anti-Zionism, and similar slogans, these calls to purge the government must be interpreted in the light of domestic political infighting in Iran. In effect, various groups are hoping to eliminate their rivals and improve their own position through this mechanism. The National Voice of Iran (NVOI), a Soviet-supported, clandestine station

~~SECRET~~

~~SECRET~~

broadcasting into Iran, has vociferously emphasized the need to purge "remnants," counterrevolutionaries, and would-be conciliators.

SIGNIFICANT TARGET GROUPS.

1. Ethnic Groups.

a. (U) (S) Azeris. By far the largest and most psychologically important of the "minority peoples," the Azeris have a natural focus for their separatist tendencies in their religious leader, Ayatollah Shariat-Madari, and the political party which follow his line, the Moslem People's Republican Party. Although in the past he has hesitated to challenge Ayatollah Khomeini directly, Shariat-Madari was forced by the holding of the referendum on the draft constitution to make clear his essential disagreement with Khomeini. Clashes over the constitutional referendum between his followers and those of Khomeini in Tabriz led to a progression of demonstrations and riots which could spark off a major Azeri secession attempt. However, the importance of Azerbaijan to Iran as a whole means that major resistance there to the Khomeini regime would probably have an adverse impact on support in predominantly Persian areas of the country. Another factor to be considered in connection with Azerbaijan is the possibility that a pro-Soviet group might emerge during either a domestic rebellion or a foreign military intervention and invite the Soviet Red Army across the border to "liberate" or "protect" the province. Shariat-Madari, and possibly some other Azeri political figures active in the National Front, could form a coalition government that would be able to rule Iran from Tehran.

b. (U) (S) Kurds. Embittered by their desertion by such former "allies" as the US and Israel, the Kurds appear to be increasingly susceptible to, if not to be inviting, Soviet bloc and leftwing support. A marriage of convenience appears to have existed for some while between Kurdish leaders and some Marxist elements among the revolutionary guerrillas who found it expedient to go underground when Khomeini and the IRC emerged as the de facto leaders of the revolution.

The Kurds are well armed and have large numbers of combatants with military experience (either as guerrillas or as former members of the Iranian Armed Forces). Despite their capability to disrupt, if not topple, a government in Tehran, the Kurds do not represent a mechanism for controlling the Iranian government or determining the long-run fate of Iran. The principal Kurdish religious figure in Iran is Shaykh Ezzedini Hosseini. The Kurdish Democratic Party continues to be the most significant political organization.

c. (U) (S) The Gulf Arabs. Because of their strategic location, this group can have an extremely adverse impact on any Iranian government. Iraq is actively involved in the area and could choose to exert its influence

~~SECRET~~

~~SECRET~~

there. The oil industry represents a major locus of labor union activity and thus may be accessible to leftwing political groupings such as Tudeh which have been active among worker groups. Personal contacts and media with a wide listening audience in Khuzestan are available in Kuwait and Bahrain. The Gulf Arabs do not represent a target with the potential to control the Iranian government, but some actions in Khuzestan could have major long-term consequences for Iran as a whole.

2. Political Groupings.

a. (U)(S) The National Front. Boasting many prominent political figures and a body of potential supporters among the middle class, professional groups, and bazaaris, the Front is nevertheless disadvantaged in internecine political conflict by its own lack of organization as well as its inability to count on effective support from any large, organized faction on the Iranian scene. By far the most accessible via external media of any target, this group is also tied into a network of expatriate contacts in Europe and the United States. In conjunction with either the military or another political group with the requisite resources, the Front could play a major role in Iranian politics.

b. (U)(S) PLO-connected "Islamic Marxists." It is not clear how many different--probably competing--groups exist within this category. A group centered around the Defense Ministry and security apparatus appears to exist. Key members of this group were apparently involved in the "Amal" Shiite movement in Lebanon during the civil war there, during which time they developed their Palestinian connection. At least some of the students responsible for the seizure of the US Embassy in Tehran, together with Foreign Minister (and former Radio/TV Director) Ghotbzadeh and his associate Ayatollah Khomeini, also appear to have Palestinian connections. The Mujahaddin (Iranian People's Strugglers), who were active during the Revolution, appear to have been subsumed within the two groupings tentatively identified above. To the extent that many Mujahaddin moved directly into the Revolutionary Guards, they would appear to be potential backers of the Amal group. However, the propaganda line and modus operandi of the so-called "Muslim Student Followers of the Imam's Policy" suggest Mujahaddin involvement or influence. Individually or in combination, these groups are probably the best situated at present to seize and hold power in Iran.

(U)(S) SUMMARY. The psycho-political situation in Iran is extremely fluid at present. A number of competing centers of power exist, each jockeying for position and for control of key political resources (e.g., media, the security apparatus, access to Khomeini). Additionally, pressures are building for this government to take concrete actions--either to resolve such dangerous problems as ethnic secessionism and shortages of essential goods or to prolong the confrontation with the United States and/or other external threats such as Iraq. A potential exists for a dissolution of

~~SECRET~~

~~SECRET~~

the clerical regime and its replacement by either a relatively moderate National Front-type government or a Marxist-oriented regime with ties to the PLO and possibly Libya. Situations in which a coalescence of forces against the clerical regime could occur would include (1) continued failure to resolve real-world problems, (2) a clear threat to continued Iranian territorial integrity, (3) collapse of public involvement in Khomeini's confrontation politics, or (4) possibly a dramatic failure to cope with a US military response to provocation.

INFORMATION PAPER

7 December 1979

SUBJECT: Middle East Attitudes Toward Embassy Crisis in Iran (U)

1. (U)(C) PURPOSE. The purpose of this paper is to summarize general Middle Eastern attitudes toward the US and review attitudes in Middle Eastern media toward the US Embassy crisis in Iran.

2. (U)(C) GENERAL ATTITUDES.

a. Previously held attitudes concerning both the US and Iran provide the context in which most Arabs view the current US-Iranian crisis. The US is viewed primarily as a political enemy of the Arab people. This attitude is a result not only of current US support for Israel, but also of US leadership in an international Western community that has been in conflict with the Arab world since the medieval crusades. The West, in Arab perceptions, is more than a political opponent. It historically has attempted to impose on the Middle East cultural and religious values hostile to those of Islam and Arabic tradition. The US now epitomizes the cultural aggressiveness of the West. This cultural expansionism has become increasingly threatening to Arab values over the past two centuries since during this period it has included technological and material benefits that are extremely attractive. In the view of many Arabs, the Iranian revolution against the Shah has had two significant implications for Western cultural encroachment. First, it was perceived as demonstrating that forced, rapid modernization and Westernization were not only undesirable, but also unworkable. Second, it crystalized a reemphasis of traditional Islamic values.

b. These positive implications of the Iranian revolution have been offset in Arab perceptions by several negative factors. Iran is not Arab and is viewed as historically, culturally, and ethnically alien by most Arabs. Iran has a history of territorial and political ambitions in Arab lands. Attitudes engendered by this experience are being perpetuated by the international leftist political overtones of the Iranian revolution, which pose a potentially serious threat to the stability of neighboring Arab states.

c. Within this context of general attitudes, the public statements of Arab sources concerning the US-Iranian crisis have been determined primarily by the manner in which the crisis affects the particular interests of each source. Most prominent among these interests is the Arab-Israeli conflict and the opportunity the crisis provides Israel's "imperialistic" US supporter to expand its influence in the region. Subregional security is a major secondary concern for the Persian Gulf states. Variations on these two general themes are emphasized by individual Arab states.

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~

SUBJECT: Middle East Attitudes Toward Embassy Crisis In Iran (U)

3. (U) The current crisis in Iran receives extensive media coverage in all Middle Eastern countries. If a high degree of government control is assumed, the press reveals that individual states do not perceive the situation as a threat to their security. To varying degrees, all media condemn or refuse to condone Iran's violation of diplomatic immunity. This attitude is generally supported on legal, humanitarian, and religious grounds. The Middle Eastern press shows a general desire to end the Embassy siege, but, with the exceptions of Egypt, Oman, and Israel, only those solutions which do not expand US influence in the region are supported. Solutions which increase the influence of anti-Zionist, anti-Imperialist actors such as the PLO will be preferred. The temporary and coincidental agreement with US on the single matter of hostage release cannot be construed as a change in the fundamental positions of the Middle Eastern countries. In this context, nations of the region can be categorized by their positions on the hostage crisis.

a. Category I--Oppose Iranian tactics; support solutions increasing US influence: (Egypt, Israel, and Oman) Dependent on US political and economic support for survival, Egypt and Israel endorse a strong US presence in the Middle East. A distinctive facet in the media coverage of Egypt is Sadat's description of Khomeini as damaging the image of Islam. Sadat offered the Shah asylum and supported US freeze on Iranian assets. Israel advocated US military intervention in Iran.

b. Category II--Oppose Iranian tactics; support solutions limiting US presence: (Persian Gulf states, Kuwait, Saudi Arabia, Jordan, Lebanon, Yemen, Algeria, and Morocco) Oil-rich Saudi Arabia and the Persian Gulf states are deeply concerned for the survival of Islamic culture in the face of Westernization. Because Israel epitomizes the Western attack on Islam, these "moderates" have taken the opportunity to strike back by furthering the cause of the PLO. As strong anti-Communists, the moderates would welcome US influence only if necessary to counter any Soviet "atheistic Communist" presence. The moderates have, as a matter of principle, spoken out against the US freeze of Iranian assets and refused to cooperate with US requests for a boycott of Iranian oil. They are wary of US "Imperialism" and they fear that such a tactic could some day be directed against themselves.

(1) The Saudi Arabian press gave extensive coverage to PLO initiatives in the crisis; but it subsided to embarrassed silence when the PLO failed. There was no mention of the implementation of US economic sanctions against Iran. Their varying attitudes toward attempts to resolve the same problem demonstrate continuance of long-standing Saudi policies. The PLO is seen as a principal weapon against Zionism and the Saudis tried to exploit an opportunity to increase its influence. US economic sanctions received no coverage because the Saudis could not resolve the dilemma of their

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~
~~CONFIDENTIAL~~

SUBJECT: Middle East Attitudes Toward Embassy Crisis in Iran (U)

antihostage stand and their opposition to any display of US power in the region. Saudi diplomats have supported Sadat's analysis of the religious aspects of the situation, but no public comment has been made.

(2) Among the other nations in the moderate group, the attempt to further self-interest has produced considerable internal inconsistency. The media in UAE, Qatar, Bahrain, and Kuwait carry objective wire service reports and editorials which shift daily from pro to anti-US positions. Qatar continues its precrisis policy of editorial attacks on the US, but it identifies closely with Saudi Arabia on religious matters.

c. Category III--Opponents of any US influence: (Libya, Syria, and Iraq) These nations differ from the moderates in that their anti-US position overwhelms any inclination to allow the US to be active in reaching even a peaceful solution to the crisis. Their fear of US "imperialism" is so intense that all three censured the PLO for trying to mediate because such action served US interests.

(1) The Libyan press had taken the most extreme position, expressing full support of every Khomeini move and reacting violently to US economic and military posturing. Nevertheless, Libyan support for Iranian intransigence faded quickly when the US actually increased its military presence. Without changing his espousal of the principles of the Iranian revolution, President Qaddafi announced to the foreign press his intention to ask Khomeini to release the hostages in the interest of world peace.

(2) Syrian reaction to the US hostage situation has been two-tiered. The government-controlled media have been vocal and obnoxious in their support of Khomeini in his confrontation with the US, but have ignored the issue of the taking of hostages. In private, Syrian reaction has been mixed.

(3) The Iraqi media rarely mentions the Iranian crisis, but the few editorials show strong antipathy toward both the US and Iran. The US is portrayed as engineering the crisis to provide an excuse to extend its influence. Khomeini is portrayed as collaborating with imperialist interests.

d. Category IV--Non-Arab nations in the region: (Afghanistan, Pakistan, Turkey, USSR) With the exception of Israel, which is firmly committed in the pro-US category, the non-Arab nations generally fall into the moderate camp on this issue.

(1) Official media of Afghanistan tends to align with Soviet anti-US pronouncements while pointing out a deterioration in international status of the Khomeini government. At the same time, Afghanistan tries to

~~CONFIDENTIAL~~
~~CONFIDENTIAL~~

~~CONFIDENTIAL~~

SUBJECT: Middle East Attitudes Toward Embassy Crisis in Iran (U)

not jeopardize its tenuous relations with Iran. This is typical reportage since the Marxist regime came into power.

(2) Government controlled press of Pakistan tends to be pro-US, but is swayed by Islamic-based public support for Khomeini and the need for Iranian support due to internal difficulties that are increased by the civil war in Afghanistan. These troubles are causing Pakistan to be more favorably disposed toward Iran and the rest of the Islamic world.

(3) Media coverage in Turkey has been limited. However, the Turkish Ambassador to Iran attempted to mediate the release of the hostages. Concurrently, Turkey has expressed an unwillingness to let the US use Turkey as a staging area for military action in Iran.

(4) Soviet external media targeted on the Middle East has followed the general internal media line. Reporting has been factual with standard emphasis on American Imperialism and the Shah's criminal guilt. Although diplomatic support is given to the principle of immunity in international fora, the matter of hostages is not mentioned in the domestic media. An exception to this is the national voice of Iran (NVOI), an unofficial "clandestine" radio station broadcasting out of the Soviet Union. NVOI has exploited the current anti-Western hysteria to press for the destruction of all vestiges of US influence in Iran. At the same time, it has encouraged release of the hostages because the crisis is seen as tactically unfavorable for the revolution.

4. (C) CONCLUSIONS. Aside from Egypt and Israel, important actors in the Middle East have displayed somewhat common views toward the seizure of US hostages. Unanimous condemnation of Iran's breach of diplomatic propriety does not, however, alter deep-seated attitudes toward the US. In their view, the confrontation is seen as a relatively insignificant part of Middle Eastern relations with the Western World. Widely held fears of Western cultural encroachment, epitomized today by US "Imperialism" and Zionism, together with their own national interests, continue to mold their disposition toward the US. Thus, the manner of the resolution of the crisis may well be as important as the resolution itself.

INFORMATION PAPER

7 December 1979

SUBJECT: Psychological Impact of Military Action in Iran (S)(U)

1. (U)(S) The purpose of this paper is to assess the psychological implications of potential US military actions in Iran and to suggest themes or actions that would limit the negative impact in the Muslim world.

2. (U)(S) Nations of the region can be categorized by their positions on the hostage crisis:

a. Category I--Oppose Iranian tactics; support solutions increasing US influence: (Egypt, Israel, and Oman).

b. Category II--Oppose Iranian tactics; support solutions limiting US presence: (Persian Gulf States, Kuwait, Saudi Arabia, Jordan, Lebanon, Yemen, Algeria, and Morocco).

c. Category III--Oppose any US influence: (Libya, Syria, and Iraq).

d. Category IV--Non-Arab nations in the region: (Afghanistan, Pakistan, Turkey) Israel is pro-US and the USSR will not be addressed.

3. (U)(S) The spectrum of significant, potential US military actions includes:

a. Occupy territory: The presence of US forces on Iranian soil would very likely cause the death of some, if not all, hostages as well as elicit a call for jihad (holy war), regardless of proximity to the hostages. However, if conducted in southern Iran, e.g., Chah Bahar, distant from population centers and residual Iranian military power, effective Iranian response would be very difficult. Under these conditions, a successful challenge to the revolution's overriding consideration of preserving newly won Iranian national self-respect would be quickly perceived by Iranians, which would provide fertile ground for questions about the legitimacy of the GOM Regime to develop. US PSYOP themes would be limited to emphasizing its leadership as an irresistible power to which Iran (and other Muslim nations) would have to submit, thus supporting questions of legitimacy. The opportunity to promote nonbelligerence among any of the Muslim nations would be virtually nonexistent, because the entire Muslim world would be united as one. However, if harm to the hostages caused the US action, and this was made known in the Muslim world before hand, official levels of the category 1, 2, and 4 countries would be responsive to US themes isolating Iran for punishment and for shaming Islam, creating the opportunity for a nonbelligerent posture for them. States around the Eastern and Southern littoral of the Saudi Arabian peninsula would be especially appreciative

~~SECRET~~

~~SECRET~~

SUBJECT: Psychological Impact of Military Action in Iran (S)(U)

of the security for the oil life line represented by a US presence in the area. However, popular response would continue to reflect the unity of Islam and would be profoundly anti-American and belligerent.

b. Conduct air strikes: A preannounced airstrike would be unlikely to cause the death of the hostages, especially if conducted outside of Tehran and took the form of limited duration strikes against a restricted number of targets. In the case where the purpose of the strikes was to force the release of unharmed hostages, official and popular reaction throughout the Muslim world would be uniformly against the United States. Material and financial assistance for Iran, along with economic sanctions against the US, would be forthcoming. The desired psychological effect of US attacks would be to create a feeling of impotence in the face of superior US power that would come from the destruction of military bases, but without the loss of dignity that the destruction of economic targets would bring, so that the choice implied by the Ayatollah's phrase, "Dignity is better than full bellies" does not have to be made because of American military actions. Where the strikes were punitive following harm to hostages, it is again likely that only the category 3 countries would officially continue to denounce the US, although popular response to armed US actions would be virilently anti-US throughout the region. One target particularly lends itself to psychological exploitation; it is the naval base at Bandar Abbas which has extensive military facilities, limited local civilian population, and is far removed from other Iranian centers of population. Its destruction following suitable warning to the local populace could provide an object lesson of American naval and air power with minimum risk which could be used in PSYOP themes and have the unspoken support of several rulers in the area.

c. Rescue hostages: This course of action would very likely result in the death of most, if not all, hostages. It offers all of the disadvantages of military action in that it would enflame the Muslim world against the US, and it offers little opportunity of success. It represents a confrontation where the Iranians would be strongest, in a major population center near available military power without the discretionary power to disengage at will and limit the effort in time and space that contributes to the favorable aspects of other options. The possibility of large civilian casualties exists which could provoke a "holy war" mentality throughout the region. This would preclude any effective US PSYOP campaign and would certainly eliminate any chance for a nonbelligerent posture by a Muslim nation.

d. Naval actions: Mining, blockade, and similar naval actions are unlikely to provoke harm to the hostages, unless the consequences of the blockades begin to have significant effects on the civil populace in Iran. Support for the Iranians would be widespread in the region and efforts to

~~SECRET~~

~~SECRET~~

SUBJECT: Psychological Impact of Military Action in Iran (S)

keep supplies reaching them overland would be strenuous. Effects of the blockade would become evident only over an extended period of time, further extended by supplies from other countries. US PSYOP themes would not have timely results to shore-up claims of US power, although the category 1 and 2 nations would unofficially favor the US naval presence required to implement the policy, especially if it were present in lieu of other, more active forces. At the same time, the less spectacular results of these actions would generate less immoderate reaction against the United States at the popular level in the Muslim world. US PSYOP themes would have to focus on these as part of a repertoire of actions and on US dignity and sense of honor which were shown in the restraint of use of power.

e. Stage a show of force: this action is already being implemented by the presence of a US naval task force in the Gulf of Oman and no harm has yet come to the hostages. Response in the region has been consistent with alignment on the hostage situation. US PSYOP approach has been to maintain a relatively low profile and let the task force presence speak for itself as an example of the propaganda of the deed. An aerial example of the same type of activity would be a low-level overflight of Tehran accompanied by a leaflet drop covering the city. While the combined effect of the proximate presence of US military airpower, coupled with leaflet propaganda, would seem to be intimidating, the close association in the minds of Arabs in the Middle East of just such overflight techniques by the Israelis would undoubtedly overwhelm any propaganda effect or theme intended by the US.

4.(U)(S) Several special considerations deserve attention:

a. Any US military action originating in, or staging through, Israel against Iran or any Arab nation would elicit such antipathy toward the US by the entire Muslim world that the conduct of psychological operations by the United States would be useless.

b. US official and commercial facilities at home and abroad can expect to become the targets of Iranian nationals and Arabs living in various countries as they respond to modifications in the psychological environment brought about by potential US military actions against Iran and by supportive psychological operations by both sides. It is also likely that terrorist groups will take advantage of this opportunity to create a psychological impact of their own. Such attempts should be anticipated and planned for in order to prevent, or at least reduce, a possible reverse psychological impact from US military actions.

5.(U)(S) The feasibility of conducting a psychological operations campaign in the Middle East is limited by the fact that access to most of the media in the region is controlled either by national governments other than the

~~SECRET~~

~~SECRET~~

SUBJECT: Psychological Impact of Military Action in Iran (S) (U)

United States, or by groups not readily subject to influence by the US. The voice of America could be made available, and special assets such as RIVET RIDER might have local significance. Other widely heard stations which might be inclined to support a US PSYOP campaign could include BBC, Radio Cairo, and Radio Monte Carlo. Other powerful stations heard in the region are a station from Islamabad oriented toward the Muslim world, Radio Riyadh oriented on the Arab world, and Radio Moscow; however, it is unlikely that those would actively support a US PSYOP effort. The feasibility of a US PSYOP campaign employing printed materials is also limited by low literacy levels and media access.

6. (U)(S) Summary. The "military action which appears to offer the greatest potential in Iran is physical occupation, for a short period of time, of selected, isolated site in the southern portion of the country. The central objective of the occupation would be the demonstration at a strategic location on Iranian national territory of the irresistible force of the United States. The psychological aim would be to deprive the Gorn regime of its sense of self-respect based on honor and dignity and in doing so to punish it for its action in seizing hostages of the American Embassy. US PSYOP themes in support of such action would highlight the necessity for Iranians to submit in the face of superior force to the physical occupation of a portion of their territory.

[REDACTED]

DEVELOPMENT

In [REDACTED] Congress approved a plan to expand [REDACTED] from an austere communications facility to a small base capable of providing minimal support to task groups which would operate [REDACTED]

will be able to provide limited logistic support such as mooring, fueling, loading/offloading for ships of a small task group as well as providing communications support for units operating in [REDACTED]

for a six ship carrier task group as well as for an AE/AOE.

[REDACTED] will also serve as a base for patrol aircraft providing air surveillance support to ships [REDACTED]

There will be no facilities ashore designed to support ships crews, nor are there any facilities ashore to provide any ship maintenance or repair. The original communications station construction was authorized in the [REDACTED]

The expansion program construction was authorized in the [REDACTED] MILCON programs at a cost of approximately [REDACTED]. The communications station construction is complete. The completion of the expansion program is scheduled for the end of [REDACTED]. Construction schedule is attached as TAB B.

U.S. NAVY USE OF [REDACTED]

- U.S. operation of facilities [REDACTED] is governed by agreement with [REDACTED]
- There is no current significant policy statement regarding use [REDACTED] by U.S. Naval forces.
- Historically, use has consisted of:
 - P-3 support
 - communications
 - token refueling
 - limited logistic support for CVTG when within COD range

- E
- Routine logistic support for [REDACTED] Surface Combatant Task Groups is not routinely provided because these forces normally have a mobile logistic support ship in company. [REDACTED] has been used as a base for onward movement of spare parts and personnel for Carrier Task Groups when within COD range. Logistic support from [REDACTED] task groups during contingency operations would be envisaged. This support would include mooring, fueling, loading/unloading for ships and fueling and maintenance for CV aircraft.
 - A token refueling of a destroyer was successfully accomplished in March, 1978, in order to test the fuel handling capability. Capabilities summarized in TAB A.

~~SECRET~~~~(C)~~ [REDACTED] SURGE SUPPORT~~(C)~~ I. Required Analysis and Evaluation

Suitability of the U.S. facility at [REDACTED] to handle major surge force equipment supplies, and recommendations for improvements.

~~(C)~~ II. NSF Operations and Personnel Manning

Navy Support Facility (NSF) [REDACTED] was officially established [REDACTED] with Naval Communications Station [REDACTED] as the primary tenant. The change from a limited U.S. Navy communications facility was effected to provide limited fleet support as well. When completed the Naval Support Facility [REDACTED] will be able to provide limited logistic support such as mooring, fueling, and loading/offloading for ships of a small task group as well as provide communications support for units operating in [REDACTED]. The [REDACTED] provides anchorage for a six ship carrier task group as well as for an AE/AOE. [REDACTED] also serves as a base for patrol aircraft providing air surveillance support to ships in [REDACTED]. Facilities ashore are neither designed to support ship's crews, nor to provide any ship maintenance or repair.

The post-FY-80 manning for NSF [REDACTED] is projected to total nearly 1700 permanent and temporary personnel:

Activity	Off	Enl
NAVSUPPAC	19	452
NAVCOMMSTA	6	122
SECGRU	2	62
Weather Station	1	9
VP/VQ	26	71
FASM	3	24
Subtotal	57	740
[REDACTED]	2	22
Total	59	762

Construction personnel include approximately 800 officers and men of the Naval Construction Force and 50 civilians from the PWC, [REDACTED]. This group will be occupied with construction noted above until [REDACTED]. In the absence of additional major construction assignments, it is assumed that a construction detachment of 50 to 100 officers and men and 40 to 50 civilians will be permanently required. Thus, the temporary facilities of [REDACTED] where the Seabees are housed, would be freed for other uses on [REDACTED] or they could be transferred to another site.

(C) III. Facilities and Support

E The facilities and capabilities at [REDACTED] must be viewed at three levels -- those facilities now operational, facilities under construction, and additional facilities potential considering constraints to further developments.

A. Current Facilities

Facilities currently operational provide:

E Communications support for all units in the [REDACTED] Turning basin and anchorage capable of accomodating a 6-ship carrier task group.

Tanker load/off-load capacity of 585 bbl/hr through a floating line.

POL storage for 220,000 bbl JP-5.

Runway, [REDACTED]

E Parking apron [REDACTED] capable of accommodating about 28 aircraft.

Permanent/temporary accommodation for 85 officers, 146 enlisted, and 28 civilians (Permanent facilities house 25 officers and 290 enlisted).

Size and capacity details of these facilities are shown in TAB A along with details for those facilities due to be completed by [REDACTED]

B. Facilities Under Construction

Major facilities to be completed are:

Fuel and general purpose pier to handle 180,000 bbl in 24 hours

A POL storage, [REDACTED] bbl tanks.

Aircraft maintenance facility.

Ammo storage, Navy and Air Force.

Additional permanent housing for 450 enlisted and 32 officers.

Recreation, warehouse, medical and cold storage facilities.

C. Constraints to Further Development

E There is scope for construction of additional support facilities and for upgrading the air field. However development potential is limited by agreement with [REDACTED] the area and configuration of the [REDACTED], and the limited ground water supply. U.S. jurisdiction is limited by [REDACTED] to [REDACTED] of the [REDACTED] total [REDACTED] acres, TAB B. Much of the available land is either undevelopable or otherwise restricted due to the presence of clearance requirements for explosives and for air and communications receiver/transmitter operations, see TAB C. [REDACTED]

~~CONFIDENTIAL~~

~~SECRET~~

~~CONFIDENTIAL~~

E [REDACTED] With completion of a proposed [REDACTED] Military Construction project, the developed permanent, temporary and emergency well water supply should be adequate for an [REDACTED] population of about [REDACTED]. An unspecified additional ground water resource exists which could be developed.

D. Surge Support

E NSF [REDACTED] has, at present, limited capacity to support a surge other than to provide an air strip and anchorage for emergencies or transients and future capabilities to supply POL [REDACTED] and some ammunition [REDACTED]. Temporary support facilities to house up to 700 people would be available by [REDACTED] only if the Naval construction forces complete their major work and depart without relocating their relocatable modules.

The facility as now developed or funded could support the following in the limited mode noted. Mobile augmentation to enhance the capabilities are also suggested.

E 1. Anchorage of a six-ship task force. The ships could not go cold iron and personnel would have to berth and mess on-board. Aircraft maintenance would have to be performed aboard ship. An AD could be anchored in the [REDACTED] to service Naval surface units. Existing or planned general warehouse and cold storage space would be only marginally adequate to support the current [REDACTED] population and would not be able to provide any general supply support for sustained surge operations. Providing full supply support from [REDACTED] would require construction of additional warehouses, piers and a larger cold storage facility; in effect, establishing a Naval Supply Depot.

E 2. P-3 operations and landings by C141s, C5s, KC-135 tankers and TACAIR transients. Refueling and personnel support facilities are inadequate for more than an occasional visit. Surge force personnel would have to live in tents and utilize B/C rations unless [REDACTED] were vacated by the Naval construction forces. Military Airlift Command should be prepared to position high usage C-141/C-5 repair parts and maintenance crews at [REDACTED] at the commencement of any surge in order to increase airlift reliability. Additionally, a backup aircraft prepositioned at [REDACTED] to support Navy requested Special Assigned Air Missions to littoral airfields would be most desirable, although this would reduce number of operational aircraft assigned because of ramp capability.

The concrete runway is [REDACTED]

E [REDACTED] should be able to land and take off, but the runway and taxiways are not capable of sustaining B-52 operations due to their narrow widths and the thin sections of concrete.

~~CONFIDENTIAL~~

~~SECRET~~

~~CONFIDENTIAL~~

AE
3. POL storage adequate to sustain a typical [redacted] task group for approximately 28 days. This supply also is designed to serve [redacted] contingency needs although at present JP-5 is the only fuel on the [redacted]. Following completion of the AOE-capable pier in [redacted] a POL throughput of about [redacted] barrels per month would be possible. This should be sufficient to accommodate three CVBG's, two ARG's and a ten ship URG at combat expenditure rates. It, is however, predicated on 100 percent dedication of the pier to POL.

E
4. Only outside storage is now available for ordnance. [redacted] concrete magazines and [redacted] yds of open storage comprising 7 barricaded modules are programmed for construction by [redacted]. Surge force units could be given limited ordnance support by alternating MSC ships at anchor in [redacted] and shuttling Navy munition carriers (AEs) between [redacted] and the task forces. Hence, ordnance requirements would be satisfied primarily by sealift from [redacted].

The critical value of [redacted] dictates that adequate air defense be programmed for [redacted]. As a minimum, early warning radar and an air defense missile battery would be required. In addition, and if available at the outset of hostilities, a TACAIR detachment would be deployed to [redacted] for an increased air defense capability. All these units would require additional support facilities to be constructed.

E. Costs of Additional Facilities

E
A surge could involve elements of one or more services and the facilities required would vary accordingly. Therefore unit costs to construct certain types of facilities which could be required are given in TAB D. These costs could be used to price facilities that would be required for a considerable mix of forces. Constraints and the carrying capacity of the [redacted] would have to be accounted for.

Preliminary analyses were made to determine costs of facilities required to support two frequently mentioned forces; a 5-ship deployment consisting of 1 CVA or LHA, 3 PF/DD and 1 SSN, and the deployment of B-52 aircraft. The associated facilities, costs, and a feasible construction schedule are shown in TABS E and F. Costs would total \$429 million if completed by contractors and approximately half that amount if accomplished by Seabees. However, as the program size would increase, Seabee resources would be unable to accomplish the work in reasonable time.

Should it be necessary to store supplies at [redacted] to support surge operations on the [redacted] littoral, a considerable expansion of road, storage and cargo handling facilities would be required.

Additional personnel required could include those for:

~~CONFIDENTIAL~~

~~SECRET~~

~~CONFIDENTIAL~~

~~SECRET~~

E
Cargo handling;
[redacted] defense;
Air operations;
Aircraft maintenance; and
Medical

(C) IV. Recommendations

A. Specific Recommendations.

It is recommended that:

1. The water supply system be upgraded as planned for the MILCON [redacted] program.
2. A fuel pit for aircraft refueling be constructed.
3. A prefabricated hanger be prepositioned for erection if C141/C5 maintenance would be required.
4. The pier and associated facilities for permitting ships to go "cold iron" be built as part of a continuing upgrading of the facility.
5. Facilities be designed to support operation of FBIIIs, and consideration be given to modification of the runway to support emergency landings of B-52s.
6. Plans be drawn and costs be estimated for constructing facilities for supply staging and defense of NSF [redacted]

E
B. Discussion

Construction of a pier for berthing of a 5-ship task group would contribute significantly to reduced wear and maintenance requirements for ships. This facility would be of value not only for a surge but would be a [redacted] facility for U.S. forces in the [redacted]

E
It is unlikely that B-52s would have to repeatedly fly into [redacted]. For contingencies around the littoral FBIIIs should be capable of supporting operations.

Any consideration of widening the runway must account for the adverse effect the action would have on the [redacted] talks.

Should the decision be made to modify the airstrip, it is recommended that it be widened by 2-25 foot shoulders, the taxiways be widened, and a 22-inch deep concrete keel be placed down the middle of the runway to support the heavy

~~CONFIDENTIAL~~

~~CONFIDENTIAL~~

~~SECRET~~

loadings of B-52s. These improvements to support emergency landings of B-52s would require shut down of the air strip for a prolonged period unless the keel were constructed to one side of the present runway with the widening being limited to one side.

TACAF ASSOW

UNKNOWN
RUBBISH DISPOSAL (U)
UNKNOWN
WATER SUPPLY (C)
WATER IS OBTAINED FROM WELLS AND STORED IN WATER TOWERS, ONE AT THE CIVIL AREA AND TWO AT THE MILITARY AREA, CAPACITY UNKNOWN. WATER IS SALTY BUT POTABLE. THERE IS A CRITICAL SHORTAGE IN SUMMER NECESSITATING RATIONING OCCASIONALLY.
AIRFIELD SECURITY (C)
ENTIRE FIELD BOUNDARY ENCLOSED BY 6 FT HIGH WIRE FENCE. NAVY GUARDS AVAILABLE FOR AIRCRAFT SECURITY. AIR DEFENSE AREA IS ON NORTHERN PERIMETER OF THE CANTONMENT. SPARE 35MM DERLICKON AND 23MM AA GUNS ARE HOUSED IN COVERED SHELTERS. THREAT/SECURITY EVALUATION AS OF 13 APR 1978 IS LOW/RELIABLE.
ADMINISTRATIVE OFFICES (C)
MAIN TERMINAL ALSO 2 HEADQUARTERS AND STAFF BUILDINGS AVAILABLE. SQUADRON OPERATIONS BUILDING.
MAIL SERVICES (U)
DOMESTIC AND INTERNATIONAL AIRLINES.
ELECTRICAL POWER (C)
POWER IS SUPPLIED BY 5 DIESEL POWERED GENERATORS. THE TWO 150 KW GENERATORS ARE HOUSED IN ONE BUILDING AND THREE 75 KW GENERATORS ARE HOUSED IN A NEARBY BUILDING, 50 HZ AND 60 HZ AVAILABLE. BACK-UP POWER IS SUPPLIED BY COMMERCIAL STATION IN THE CITY, 220V.
TRANSPORTATION
ROADS (C)
BANDAR ABBAS/KERMAN ROAD RUNS W OF THE AIRFIELD. ASPHALT IN GOOD CONDITION. GOOD ACCESS ROAD TO THE FIELD.
RAILROADS (U)
NONE
WATER TRANSPORTATION (C)
WATER DEPTH AT THE COMMERCIAL PIER IS 50 FT. A 60 TON FLOATING CRANE, A 15 TON MOBILE CRANE AND A 5 TON SELF-PROPELLED CRANE ARE AVAILABLE. THERE IS A CONVEYOR SYSTEM FOR ORE 350 TONS/HOUR. PIER IS STEEL AND WOOD CARGO HANDLING IS PRESENTLY LIMITED DUE TO A LACK OF SKILLED STEVEDORE LABOR. THIS WILL BE THE MAJOR NAVAL BASE IN IRAN.
MILITARY VEHICLES (U)
ESTIMATE AVAILABLE, TYPES AND NUMBER UNKNOWN.
COMMERCIAL VEHICLES (U)
LIMITED NUMBER OF TAXIS IN TOWN.
AIR TRANSPORTATION (MILITARY AND COMMERCIAL) (U)
DOMESTIC AND INTERNATIONAL AIRLINES.
WEATHER
STATION (U)
HOURLY AND SPECIAL OBSERVATIONS. METAR AND SPECIAL REPORTS. OPEN 24 HOURS.
CLIMATE (U)
SUBTROPICAL STEPPE. HOT AND HUMID IN SUMMER, WINTER IS MILD. ARID MAY THRU SEP, LIGHT AMOUNTS OF PRECIPITATION MONTHLY THE REST OF THE YEAR. THUNDERSTORMS ARE RARE. MAXIMUM CLOUD COVER NOV THRU FEB.
FLYING CONDITIONS (C)
THERE IS LITTLE CLOUDINESS. GALES ARE RARE BUT OCCASIONAL SQUALLS ACCOMPANIED BY SEVERE DUSTSTORMS REDUCE

STATION

HOURLY AND SPECIAL OBSERVATIONS 0000-2400Z. METAR AND SPECIAL REPORTS. OPEN 24 HOURS.

CLIMATE

SUBTROPICAL STEPPE. WINTER IS RELATIVELY COLD AND SUMMER IS SELDOM EXCESSIVELY HOT. ARID JUN THRU SEP, PRECIPITATION LESS THAN 1 INCH MONTHLY THE REST OF THE YEAR. MAXIMUM CLOUD COVER NOV THRU FEB, VERY LITTLE CLOUDINESS THE REST OF THE YEAR. THUNDERSTORMS ARE RARE OCCURRING MOST FREQUENTLY IN THE SPRING

FLYING CONDITIONS

VISIBILITIES, GENERALLY GOOD, ARE OCCASIONALLY RESTRICTED IN WINTER AND EARLY SPRING BY FOG AND SNOW. AIR ROUTES OVER THE NEARBY RIDGES ARE OCCASIONALLY RESTRICTED FOR DAYS AT A TIME IN WINTER.

SIGNIFICANCE

IN EMERGENCIES, FIELD COULD HANDLE MEDIUM JET BOMBERS. IT IS AN IMPORTANT AIRFIELD FOR DOMESTIC USE, SERVING A POPULATION OVER 340,000. CONSIDERED NOT FEASIBLE FOR HEAVY JET TRAFFIC DUE TO THE RESTRICTIONS IMPOSED BY THE SURROUNDING MOUNTAINS WHICH MAKE APPROACHES TO THE RUNWAY DANGEROUS.

SIGNIFICANCE

SHIRAZ INTERNATIONAL WAS DEVELOPED TO INCREASE THE FLOW OF TOURIST TRADE ESPECIALLY THAT DESTINED FOR PERSEPOLIS. THE CIVIL TERMINAL IS PLANNED FOR ORDERLY EXPANSION. AT THE PRESENT, IT IS LARGER THAN REQUIRED FOR THE TRAFFIC IT WILL BEAR. IT IS ALSO A MAJOR IIAF AIRFIELD (TADAYAN AB), HOME OF THE 7TH FIGHTER AND 7TH TRANSPORT WINGS. IT HAS A SECONDARY ROLE OF ASSEMBLING MILITARY AND MILITARY FORCES TO SUPPRESS ANY UPRISINGS OF DISSENTING TRIBES. IT IS ALSO A PARTS SUPPLY AND MAINTENANCE DEPT. SUPPLY AND MAINTENANCE DEPT. LACK OF GOOD ROADS AND RAILROADS MAKE THIS MODERN INTERNATIONAL AIRPORT THE MAJOR TRANSPORTATION CENTER FOR THE AREA.

TACAF ASSUIM

RUBBISH DISPOSAL (U)
AVAILABLE
WATER SUPPLY (C)
FROM WELLS ON AIRFIELD. TANK STORAGE AND TREATMENT SYSTEM.
AIRFIELD SECURITY (C)
TWO GATE HOUSES AND SECURITY FENCE. AIR POLICE AND GUARD SERVICE AVAILABLE. THE THREAT/SECURITY EVALUATION
RATING OF 20 MAR 78 IS LOW/RELIABLE.
ADMINISTRATIVE OFFICES (U)
HEADQUARTERS BUILDING CONSTRUCTED OF BRICK, 17010 SQ FT. UTILITIES INCLUDE WATER, ELECTRICITY, TELEPHONE AND
RADIO. THREE SQUADRON OPERATIONS BUILDINGS TOTAL SQ FT 11025 AND OPERATIONS BUILDING WITH TOWER.
MAIL SERVICES (U)
AVAILABLE
ELECTRICAL POWER (U)
MAIN POWER FROM OUTSIDE SOURCE AT DEZ DAN 11000 VOLTS. THERMOELECTRIC TYPE POWER PLANT USED IN EMERGENCY HAS
AN AVERAGE OUTPUT OF 500 KW AND MAX OUTPUT OF 950 KWS BETWEEN 1700-2100 HOURS. TRANSMISSION SYSTEM BOTH
OVERHEAD AND UNDERGROUND. ENGINES ARE GERMAN MAKE 500 HORSEPOWER, 500 RPM. GENERATORS ARE GERMAN CUNZ,
KVA-375, 120 VOLT, 60 AMP, 3 PHASE, 50 CYCLE.

TRANSPORTATION

ROADS (U)
ANDIMESHK/AHAZ ROAD IN FAIR CONDITION. ASPHALT ON CRUSHED ROCK BASE, 24 FT WIDE. HAS 3 FT DIRT SHOULDERS.
GOOD DRAINAGE, NO LIGHTING.
RAILROADS (C)
STATION AND RR REPAIR SHOP WITH ROUNDOUSE AT ANDIMESHK 2 MILES NW. IT SERVICES THE TRANS-IRANIAN RR. SPUR
TO AIRFIELD POL, WAREHOUSE AND AMMO STORAGE AREAS.
WATER TRANSPORTATION (C)
NEAREST PORT AT KHORRAMSHAHR 122 MILES S. MAJOR FACILITIES, 7 WHARVES. SERVED BY ROAD.
MILITARY VEHICLES (U)
AVAILABLE
COMMERCIAL VEHICLES (U)
PRIVATELY OWNED TAXIS AND A FEW PRIVATE BUSES RUN BETWEEN DEZFUL AND ANDIMESHK TO THE AIR BASE.
AIR TRANSPORTATION (MILITARY AND COMMERCIAL) (U)
NO SCHEDULED CIVIL OR MILITARY.

WEATHER

STATION (U)
HOURLY AND SPECIAL OBSERVATIONS 0000-2400Z. METAR AND SPECIAL REPORTS. OPEN 24 HOURS.
CLIMATE (U)
DRY SUMMER SUBTROPICAL. SUMMER IS SOMETIMES EXCESSIVELY HOT WITH MAX TEMPERATURES OVER 110 AND EXTREMES OVER
120; WINTER IS MODERATELY COLD SELDOM BELOW FREEZING. ARIJ JUN THRU SEP; MODERATE PRECIPITATION NOV THRU FEB
AND LIGHT THE REST OF THE YEAR. THUNDERSTORMS ARE RARE OCCURRING MOSTLY IN THE SPRING.
FLYING CONDITIONS (U)
VISIBILITIES, GENERALLY GOOD, ARE MORE FREQUENTLY RESTRICTED JUN THRU SEP. DUST IS THE CHIEF RESTRICTION IN
ALL SEASONS. JET STREAMS OVER THE AREA FROM LATE NOV TO APRIL.
PRECIPITATION (U)

11-713
